NetSuggest is an internal platform for employees to discover, recommend, review, and organise places, with features for map-based discovery, ratings, saved places, and itinerary planning. Admins can manage users, places, and update requests.

NetSuggest primarily targets Netcompany employees who travel, join team activities, or temporarily relocate. It helps expatriates find trusted local recommendations from colleagues, while enabling local employees to share places, reviews, and useful information.

Features overview

Authentic ation	Discovery	Place Managem ent	Reviews	Itinerary	Notificati ons	Admin
MAIN	MAIN	MAIN	SUPPORT	MAIN	SUPPORT	SUPPORT
