

Orchard Childcare Limited

Food Safety Policy

Orchard Childcare is committed to ensuring that safe and healthy practises around the storage, preparation and service of food are followed at all times. Staff involved in food handling and preparation have to meet high standards of personal hygiene. Any member of staff showing signs of infection or ill health will not be permitted to handle food.

Orchard Childcare follows the guidelines set out in 'Safer Food, Better Business' (FSA) and is registered as a food business with our local authority. We are regularly inspected by Environmental Health to ensure that health and hygiene standards are being met.

All staff involved in food handling have received food handling and hygiene training. When preparing food, staff follow the requirements of current food hygiene legislation, and best practice including:

- Always washing hands with anti-bacterial soap and hot water before and after handling food and using the toilet
- Using clean, disposable cloths
- Using the correct colour coded chopping boards (e.g. red for raw meat)
- Not being involved in food preparation if they are unwell
- Making sure all fruit and vegetables are washed before being served
- Removing jewellery, especially rings, watches and bracelets, before preparing food
- Covering spots or sores on the hands and arms with a waterproof dressing
- Keeping fingernails short, clean, and free from varnish
- Staff **must** prepare food in a way to prevent choking
- Staff must prepare food in line with allergies, intolerances, and special dietary requirements of the children attending

Supervision whilst eating

Whilst children are eating there **must** always be a member of staff in the room with a valid paediatric first aid certificate.

Children **must** always be within sight and hearing of a member of staff whilst eating.

Out of School Club recognises that choking can be completely silent, therefore visual supervision of children's faces whilst eating is part of our everyday practice. Staff will remain vigilant that children are eating in a way that prevents choking and are ready to react to any unexpected allergic reactions.

Allergies and dietary requirements

Before a child is admitted to the setting Orchard Childcare will obtain information about any special dietary requirements, preferences, food allergies and intolerances that the child has, and any special health requirements. This information will be shared with all staff involved in the preparing and handling of food through a list displayed in the kitchen and in the kitchen FSA book that is completed daily by the person responsible for snack that day.

At each mealtime and snack time Orchard Childcare must nominate an individual who is responsible for checking that the food being provided meets all the requirements for each child. This will be communicated/shared by completing the online form and signing and dating in the FSA book.

Orchard Childcare will have ongoing discussions with parents and/or carers and, where appropriate, health professionals to develop allergy action plans for managing any known allergies and intolerances. This information must be kept up to date by the setting and shared with all staff.

Orchard Childcare uses the BSACI allergy action plan format, which provides comprehensive guidance for managing allergic reactions and anaphylaxis.

Orchard Childcare communicates allergen information to parents through: {State your methods - e.g., displayed menus showing allergens, weekly meal planners, daily communication sheets}

Staff Training and Allergen Awareness

Orchard Childcare ensures that all staff are aware of the symptoms and treatments for allergies and anaphylaxis, the differences between allergies and intolerances and that children can develop allergies at any time. We do this through online training.

Incident Recording

When a child experiences a choking incident that requires intervention, Orchard Childcare staff must record details of where and how the child choked and make parents and/or carers aware.

Orchard Childcare will review records periodically to identify if there are trends or common features of incidents that could be addressed to reduce the risk of choking. Appropriate action will be taken to address any identified concerns during this review process and following any incidents of concern during the provision of food within our club.

Food storage

All foods are stored according to safe food handling practices and at a correct temperature, to prevent the growth of food poisoning organisms and to ensure that food quality is maintained.

Fridge temperatures are checked and recorded on a daily basis as part of our daily environment checks. If there are temperature fluctuations that are not explained by simple user error (eg failure to close the fridge properly), a new fridge will be purchased.

Cleaning

- The fridge is cleaned thoroughly, with warm, soapy water, on a weekly basis.
- Food is checked for freshness - anything past the use by date will be disposed of.
- Freezers are defrosted and cleaned once a month.
- All food preparation surfaces are wiped clean after use with anti-bacterial cleaner and disposable cloths.
- All chopping boards are cleaned after use with warm soapy water, anti-bacterial cleaner and then thoroughly rinsed.
- Appropriate controls are implemented to reduce the risk of cross contamination.
