

## Baunton WTW

**GODSELL • ARNOLD**  
PARTNERSHIP LTD

Consulting Civil and Structural Engineers

### Project details

Civil and structural design for an Amazon Filter installation at Baunton Water Supply Works, Cirencester.

The facility is a Thames Water borehole abstraction site and the project comprised below ground water main diversions to a new Amazon filter plant building, piping and valving configuration within the building, design of reinforced concrete base slab, and outline design of the portal frame. GAP Ltd. also assisted the client with producing site and building layout plans and elevations for planning application purposes.
