

THE NSITE LEADS SYSTEM

Add lead-generation software to what you offer — and earn upfront plus residual income on every client.

Nsite Spark Connectors · Leads System · Updated July 11, 2026

What You're Introducing

The Nsite Leads System is AI-powered lead-generation and prospecting software. It finds verified, in-market leads — real people and companies with checked contact details — and hands the client a clean list ready to drop straight into their CRM for follow-up. It's the same simple Connector deal you already know: you make the introduction, we handle the demo, setup, and support, and you earn for the life of the client.

Same role you already play. You don't run the software or do anything technical. You introduce a business that needs more leads, we take it from there, and you get paid — upfront and every month after.

The Packages

One system, priced by scale. Every client gets verified leads delivered monthly; the tiers differ by volume and by data depth — Leads Authority is the only tier that includes buyer-intent and influencer data on top of everything Starter and Growth offer, which is worth knowing when a prospect asks what the higher tiers actually unlock.

Package	Best for	Setup	Monthly
Leads Starter	Solo & small business · 250–450+ leads/mo	\$197	\$397/mo
Leads Growth	Growing teams · 400–900+ leads/mo	\$397	\$797/mo
Leads Authority	High-volume & agencies · 486–1,500+ leads/mo	\$1,197	\$1,997/mo

How You Get Paid

Every Leads client pays you in two ways — and it's important to know the difference:

ONE-TIME — Setup commission — 20% of the setup fee, paid once at signup.

RESIDUAL — Monthly commission — 20% of the monthly fee, paid every month the client stays active.

Paid once, at signup:

Package	Setup fee	Your 20% — one-time
Leads Starter	\$197	\$39
Leads Growth	\$397	\$79
Leads Authority	\$1,197	\$239

Paid every month the client stays active (residual):

Package	Monthly fee	Your 20% — residual / mo
Leads Starter	\$397	\$79 / mo
Leads Growth	\$797	\$159 / mo
Leads Authority	\$1,997	\$399 / mo

Two payments, two types. The setup commission is a one-time payment when the client signs. The monthly commission is residual — it keeps paying every single month your client stays active, for the life of the client. Sign ten clients and you stack ten monthly checks, month after month, on top of every new setup.

What a Single Client Earns You — Year One

Your one-time setup commission plus twelve months of residual:

Package	One-time (setup)	Residual $\times$ 12 months	Year-one total
Leads Starter	\$39	\$953	\$992
Leads Growth	\$79	\$1,913	\$1,992
Leads Authority	\$239	\$4,793	\$5,032

Where Residual Changes Everything

The setup commission is nice, but the residual is the prize — it compounds with every client who stays. Here's the monthly residual from Leads Growth clients alone:

Active Leads Growth clients	Your residual income / month
5 clients	\$797 / mo
10 clients	\$1,594 / mo
20 clients	\$3,188 / mo

This stacks on everything else you do. Leads residual is paid on top of your AI Suite and Website commissions — it's one more recurring stream from the same relationships you're already building.

Your Rate Grows as You Level Up

The 20% you start with is just the floor. Your residual rate rises with your active client count — exactly like the rest of the Nsite program. Upfront stays 20% at every level; the residual climbs:

Every level also includes the full Connector toolkit, Affiliate Hub access, a feature on our website, and your own Connector landing page — from day one, no minimums required. What follows is what you unlock on top of that as you grow.

Connector Level	You unlock	Residual rate
Spark Connector	Start here — 20% upfront + monthly, no minimums, personal onboarding call	20%
Preferred Connector	5 active clients — priority support, 6-month strategy calls	20%
Strategic Connector	15 active clients — quarterly strategy, co-branded page	25%
Premier Connector	30+ (invitation) — joint events, VentureBlazers podcast feature, first access to new products	30%

It Stacks With Your Other Nsite Income

- **Project Manager — 30%** — on the setup of a Leads build you personally manage — one-time, paid at the build. Raised from 12% as of July 11, 2026, and now also covers walking the client through their mandatory Business Profile setup. (See the Project Manager Opportunity.)
- **Team override — 5%** — on every Leads deal a Connector you recruited closes — upfront + residual, paid on top, never reducing their share. (See Build Your Team.)
- **Nsite Combo** — Leads also pairs with the AI Suite in the Nsite Combo bundle, priced and commissioned as one combined deal. (See Nsite Combo materials.)

Refer it, manage it, or build a team around it — the Leads System pays on all three, the same way the rest of the program does.

Note: There's also a private, lower-priced \$297/mo version of Leads Starter, offered only when a prospect's stated objection is price — same 20%/20% commission structure as public Starter, just calculated off the \$297 monthly figure instead of \$397. Ask about it if you're in a conversation where price is genuinely the blocker.

Also: Nsite Smart Connectors offers three tiers of discounted, personal-use Leads System access for your own outreach (Starter/Growth/Pro). None of it earns commission and none of it is a package you sell to clients — everything on this page applies only to the three client-facing packages above.

Helping Businesses Grow. Building Recurring Income Together.
