

Mazuri[®]
EXOTIC ANIMAL NUTRITION

Exotic Animal Supplements

TABLET OPTIONS

Providing balanced nutrition to animals in managed care can be tricky. Often an animal's natural diet is difficult or even impossible to replicate with available food items, and they may not provide the full nutrition each animal needs. For example, feeding commercially available frozen fish can result in vitamin or mineral deficiencies if proper supplementation is not provided. Creating a balanced nutrition program takes care and attention to detail, and every feeding program is unique.

For over 30 years Mazuri has been a world leader in quality exotic animal nutrition. Our nutrition products are manufactured in our own plants with the highest quality standards, made in a responsible way that reduces our impact on the environment. We support zoo and aquarium nutrition programs with reliable, high-quality diets and supplements that help maintain animal health and wellness through good nutrition. Mazuri is proud to share the improvements we have made in our supplement offerings to help better meet the needs of exotic animals under human care.

WHY MAZURI® EXOTIC ANIMAL NUTRITION?

- Developed from our collaborative research with zoos, aquariums and universities
- Formulated by PhD nutritionists to complement fish-based diets
- Optimized vitamin and mineral balances for specific animal types, not a generic all-species supplement
- Targeted supplements available for a variety of species in multiple formulations and sizes to meet individual animal needs
- Manufactured in a facility with the highest quality certification, exceeding FDA requirements (FSSC 22000-certified)

Marine Mammal Tablets

Six Marine Mammal Supplement formulas provide a variety of options to help address specific nutrient needs of individual animals and nutrition programs.

Next Generation Products

The next generation of Mazuri® Marine Mammal Supplements have been designed to be fed according to the animal's body weight, as opposed to the amount of fish fed, which is a more efficient way to supplement large marine animals. Specific formulas can be chosen to complement the animal's diet, based on the presence or absence of key nutritional elements:

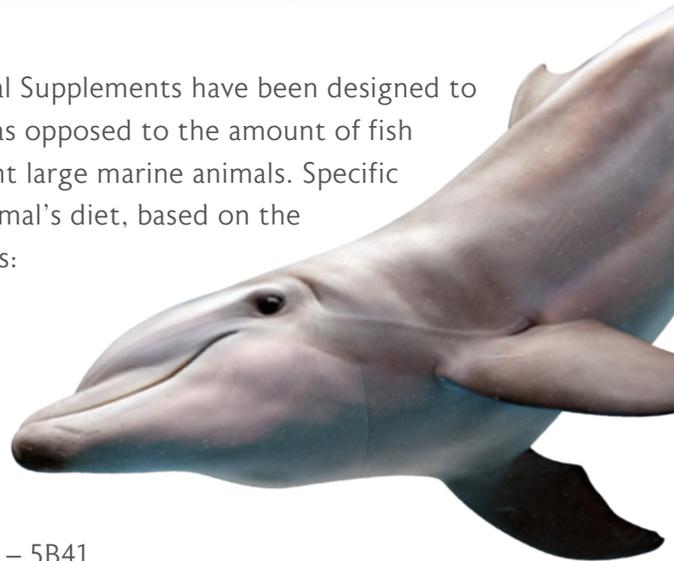

- Vitamin C to aid in immune health
- Lutein, a carotenoid, to support eye health
- Grape seed extract, a source of polyphenolic antioxidants for immune system support

- Marine Mammal Supplement – 5B40
- Marine Mammal Supplement with Vitamin C – 5B41
- Marine Mammal Supplement with Vitamin C, Lutein, & Grape Seed Extract – 5B42
- Marine Mammal Supplement with Lutein & Grape Seed Extract – 5B43

Classic Products

Our classic Marine Mammal Supplements allow for targeted supplementation of lutein, when desired, or vitamin A as needed. For animals fed gutted fish, vitamin A may be deficient.

- Marine Mammal Lutein Supplement – 5B44
- Marine Mammal Supplement with Vitamins A & C – 5M26

Bird Tablets

Mazuri® Bird Supplements are formulated to help balance the nutritional needs of carnivorous bird species who are fed a diet of frozen fish. Two tablet sizes are available to efficiently supplement birds by their feeding habits. Large Bird tablets are formulated for species that typically eat larger prey, while Small Bird tablets are designed for birds that consume smaller prey or are selective about having tablets in their food. Both sized tablets are also available with vitamin A, designed for birds fed gutted fish, which may be deficient in vitamin A.

Mazuri® Auklet Supplement is for auks and other small sea birds and provides key vitamins and minerals along with supplemental carotenoids to support vibrant plumage.

Products

- Small Bird Supplement - 5TLC
- Small Bird Supplement with Vitamin A – 5M25
- Large Bird Supplement – 5TLB
- Large Bird Supplement with Vitamin A – 5M23
- Auklet Supplement – 5M2G

Elasmobranch Tablets

Mazuri® Shark & Ray Supplement is the next generation of our original Shark/Ray Tablet, with an updated formula that incorporates more recent nutrition insights. This vitamin and mineral supplement is designed to help balance the nutritional gaps in the diet of elasmobranchs in aquariums. The tablets contain supplemental iodine, a key nutrient for thyroid health that may be removed from the water through typical filtration methods.

Products are available in two tablet sizes

- Shark & Ray Supplement – 5MD8 (0.2 g)
- Shark & Ray Supplement – 5MD8 (1.5 g)
- Shark & Ray High Iodine Supplement – 58QZ

Terrestrial Mammal Tablets

The updated Mazuri® Fishing Cat & Otter Supplement now includes increased levels of vitamin E and thiamine to complement the species' predominantly fish-based diets.

Products

- Fishing Cat & Otter Supplement – 5M2F
- Primate Supplement – 5072

Sea Turtle Tablets

Mazuri® Sea Turtle Supplement is designed to help balance the fish-based diet of sea turtles under human care. This vitamin and mineral supplement contains vitamin C and beta-carotene to help provide immune support.

Products are available in two tablet sizes

- Sea Turtle Supplement – 5B48 (0.5 g)
- Sea Turtle Supplement – 5B48 (1.5 g)

Now Offering New Packaging:
