# A second life, a first laptop.

*We rescue laptops gathering dust in Australian offices (and homes), give them a new life, and put them into the hands of children at rural schools in Siem Reap Province, Cambodia.*

Elements Recruitment

## The Tally - Cambodia - 2025 to date

| 95 | 2 | 115 | $6,100 |
|---|---|---|---|
| Laptops delivered | Rural schools reached | Children attending | Funds raised |

## What those funds put in the classroom

- **Desks**
- **Chairs**
- **Classroom storage units**
- **Projectors**
- **Power generators**
- **Maintenance and repairs**
- **Stationery**

*"Some had not touched a computer before. Some had not seen one. Now the whole room lights up when the lids open."*

## How a laptop gets to the school

### 01 · Collect

**Rescued, not retired**

Companies hand over laptops they've written off. Devices with years of good life still in them.

### 02 · Ready

**Wiped and prepared**

Every device is checked over, added to an assets register and set up for a classroom, not landfill.

### 03 · Learn

**Into small hands**

The laptops travel to Cambodia and become tools for reading, writing and computer skills.

## The schools we support I Where the laptops land

### Volunteer Building Cambodia

Volunteer Building Cambodia shares stories and updates from their home builds, giving a behind the scenes look at how they help poor Cambodian families get safe housing, wells and toilets in Siem Reap. Learn more here.

### Cows for Cambodia

Cows for Cambodia lets people run their own fundraising events like quiz nights, bake sales and sponsored walks to help buy cows and cover vet bills, hay and equipment for families in need. Learn more here.

## Companies helping make it possible

**Virbac Australia**
**Evolve Housing**
**West Recruitment**
**Kobelco Construction Machinery Australia**
**Schreder ANZ**
**Visy Logistics**
**Interpro**
**PhoneCycle**
**Suez Water**
**Hume Scope**

## The impact so far

Handing those laptops to the schools in 2025 for the first time was a wonderful experience. For a lot of children from 5-15 years of age, this was the first time they had ever put their hands on a computer. The smiles on their faces when I opened one up for the first time was something I will never forget. This is the beginning of breaking the poverty cycle.

## Get involved:

## Have laptops gathering dust? Give them a second life.

When your business or household retires laptops, they could be teaching a child computer skills instead of ending up as e-waste. We can handle the logistics and the delivery. You just clear the cupboard, cleanse the data and join the companies above.
