

DANIELA VALDES, APRN, FNP-C

Advanced Practice Registered Nurse

Daniela has been passionate about healthcare for as long as she can remember. Her journey into medicine has been fueled by a deep commitment to helping others and delivering the highest quality of care. She began her academic path at Keiser University, where she earned her Bachelor of Science in Nursing (BSN) through an accelerated program, graduating with honors.

Early in her undergraduate studies, Daniela discovered her true calling: becoming a nurse practitioner. After earning her BSN, she joined the emergency department as a registered nurse, completing a fellowship program to gain critical care experience while continuing her education. This hands-on exposure reinforced her desire to advance her career and pursue an advanced practice role.

Daniela's interest in plastic surgery led her to join the operating room team at Aesthetic Plastic Surgery & Med Spa of Naples, where she served as a circulating and recovery room nurse while completing her advanced degree. She also brings a strong background in functional medicine, where she developed a deep appreciation for proactive, holistic care and its role in promoting healthy aging.

Since earning her Master of Science in Nursing with Magna Cum Laude honors in December 2024, Daniela has become a vital part of the clinical team as an Advanced Practice Registered Nurse (APRN). She provides comprehensive pre-operative and post-operative care to surgical patients and offers a wide range of aesthetic treatments, including facial fillers, neuromodulators such as Botox, and non-surgical cosmetic and laser procedures. Daniela finds profound fulfillment in guiding patients through their aesthetic journeys. Her kind and compassionate approach creates a comforting environment for those she treats, and her clinical expertise ensures that every patient receives personalized, high-quality care.
