

# ARE YOU IN NEED OF A SEWER REPLACEMENT?

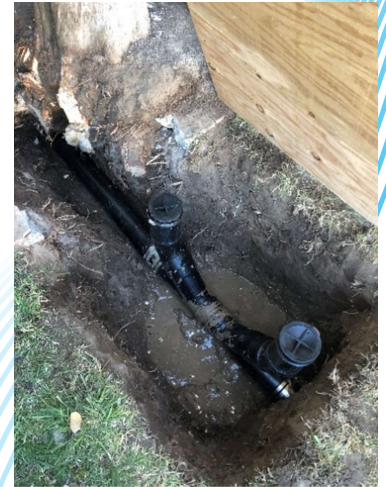

Have you received a quote for a sewer line replacement that is more than \$120 per foot? (Typically measured from your house to the sidewalk) It is common for a lot of companies to charge anywhere between \$150 to \$500 a foot and even more to cover their high overhead.

We specialize in Trenchless Sewer Line replacement and to your benefit we do not have commission salesmen, expensive advertising or a huge building full of employees that we must pay for. All of that translates back to you and why the big companies charge so much. Sadly, a lot of the big established family-owned companies have sold and are now owned by a private equity company and in the end, they charge much higher prices to cover their overhead and of course pay the investors back.

Wouldn't you like to know that you are dealing with a local company that has minimal overhead and no employees? That's right, we are truly a family owned and operated business. When you call, you will always be speaking to one of the owners, either Bill, Cody or Carson Vanderveer and on every job you will always have one if not all 3. They will treat your home as if it is their own and they leave the property cleaner than when they arrived.

With the price of just about everything increasing daily, we believe that it's time to put a stop to it and help our customers retain as much money as possible. Give us a call for a free sewer estimate and take back control of your finances.

A sewer line replacement is a huge investment, so if you are looking to get an honest and fair price, give us a call. You will find that we can usually beat most companies by hundreds if not thousands.
