

# Citizens for Congressional Equity and Accountability

A Proposal for a Constitutional Amendment to Restore Trust in Congress

We are working toward a SEA change in Congress: Support for term limits, Ethics reform, and Alignment of congressional benefits with those of the American people.

## Core Principles

- **Term Limits** – Ensure fresh leadership and reduce entrenched power by capping congressional terms.
- **Ethics Reform** – Prohibit members of Congress from buying stocks or investing in companies while in office.
- **Fair Compensation** – Align congressional pay, retirement, and health benefits with national averages.
- **Transparency** – Require full disclosure of gifts, trips, donations, and investments.

## Our Mission

To pass a constitutional amendment that establishes equity and accountability in Congress by limiting terms, eliminating financial conflicts of interest, and ensuring members serve the public, not private gain.

## **Let's Talk**

We respectfully request a brief follow-up meeting with Senator Merkley to discuss this proposal in greater detail. We aim to build a broad, nonpartisan movement to restore public trust in Congress.
