

DIRECTORY PHOTO REQUIREMENTS

Not interested in taking a photo after Mass, but would like to be in the directory?

Submit a photo of you (or your family) on our website!

Since our directory uses **square** photos, please follow these simple tips when taking or choosing your picture:

BEST

IDEAL

GOOD

Orientation: Vertical or Horizontal?

- Vertical (Portrait) is best for individuals.
- Horizontal (Landscape) is best for families or groups.
- Why? Both give us enough "wiggle room" to crop a perfect square without cutting anyone off!

Don't Get Too Close!

Leave some space around your head and shoulders. If the photo is zoomed in too tight, we won't be able to crop it into a square without losing part of your face. For the best results, please submit clear, high-resolution photos where everyone is **facing forward and their features are easily visible**.

Send the "Full Size"

When submitting your photo, always select "Actual Size" or "Original Size." High-quality files make for a much sharper printed directory!
