

# FALEGNAMERIA VENERI

confronto conoscenza condivisione

Le nostre radici

La Falegnameria Veneri è un'azienda artigiana che produce serramenti fin dai primi anni cinquanta.

Ivo e Orino i fondatori, Maurizio, Arturo e Claudio i proseguitori, Matteo, Luca, Fabio, Mauro e Diego la terza generazione.

La Falegnameria Veneri si avvale di una profonda conoscenza ed esperienza nella scelta delle materie prime: dai legnami alle vernici, dalla ferramenta alle più svariate tipologie di vetrate isolanti.

Inoltre l'azienda è costantemente alla ricerca di modelli esclusivi e soluzioni nuove per poter assicurare personalità e durabilità ai propri prodotti.

Il personale esegue direttamente ogni fase del lavoro, dal rilievo delle misure in cantiere fino alla posa in opera dei serramenti.

Il laboratorio ricopre una superficie di 900 mq ed è dotato di attrezzature all'avanguardia che permettono di eseguire lavori con massima cura e precisione.

Il reparto verniciatura interno all'azienda opera attendendosi alle normative vigenti nel rispetto della salute e dell'ambiente.

Il magazzino si estende su un'area coperta di 400 mq e contiene diverse essenze di legno che vengono direttamente sezionate e stagionate in loco per garantire stabilità ai manufatti.

L'azienda è dotata di un ampio Show Room dove è possibile vedere e toccare con mano i prodotti ed essere guidati e consigliati nella scelta.

## Finestre e serramenti speciali

Telai a vetro in legno massello o lamellare. Modello standard GT 68mm a tre guarnizioni, modello RIMA 86mm o 100mm, dove trovano alloggio vetrate isolanti da 24mm a camera singola fino a 56mm con doppia camera, consentendo un ottimo isolamento termico ed acustico. Inoltre produciamo anche la finestra modello Innova, per mantenere la naturalità e il calore del legno all'interno e proteggere l'esterno con un rivestimento in alluminio che elimina ogni tipo di manutenzione. Ogni modello è realizzabile nei formati inclinati, trapezoidali ad arco ellittico o circolare (oblò). Sistemi di apertura: a bilico verticale o orizzontale, a scorrimento complanare o ad alzante. Si rilascia la certificazione della trasmittanza termica del serramento.

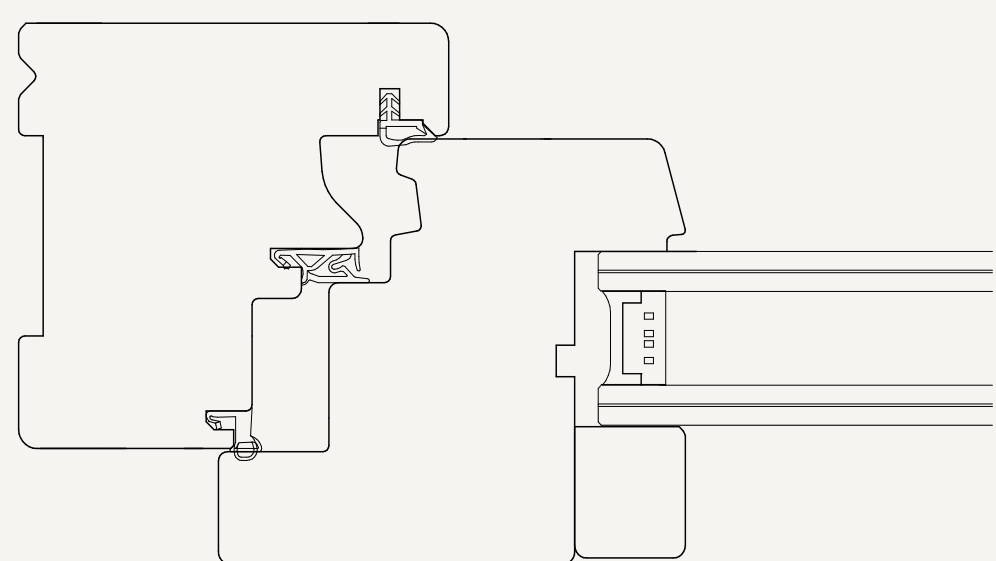

### ACCESSORI

Diversi tipi di avvolgibili,  
cassonetti coprirullo,  
scuretti a libro,  
controbancai in legno,  
fusetti e telaietti tipo inglese,  
fermavetri e coprifili con diverse tipologie di sagome,  
zanzariere incorporate,  
maniglie delle migliori marche,  
vetri di qualsiasi tipologia per soddisfare ogni esigenza di estetica,  
sicurezza, insonorizzazione e tenuta termica.

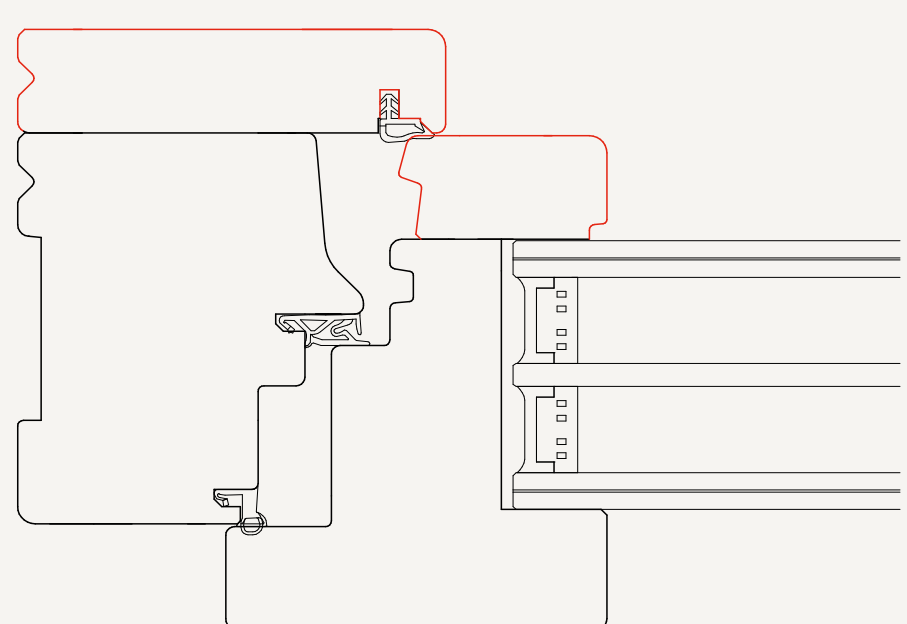

**Accessori**

**Ferramenta**

# Modelli di serramenti.

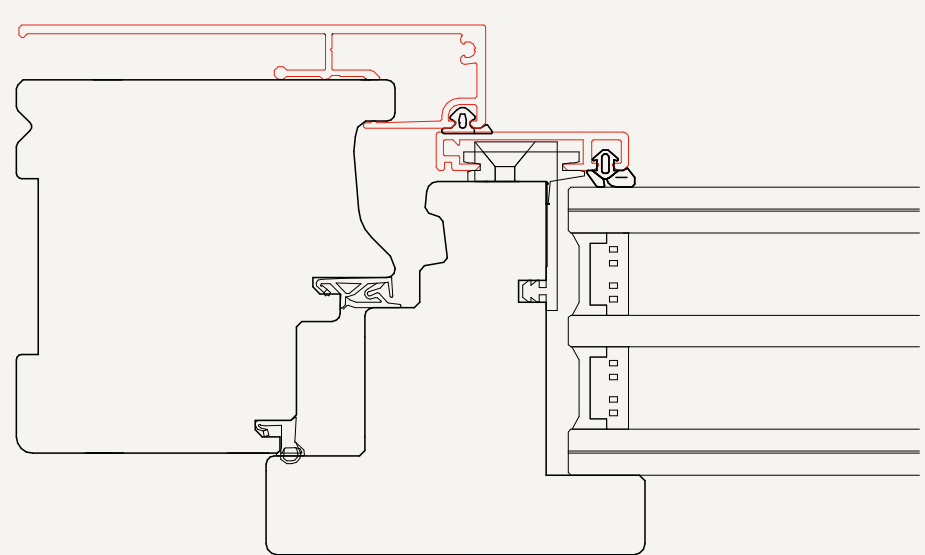

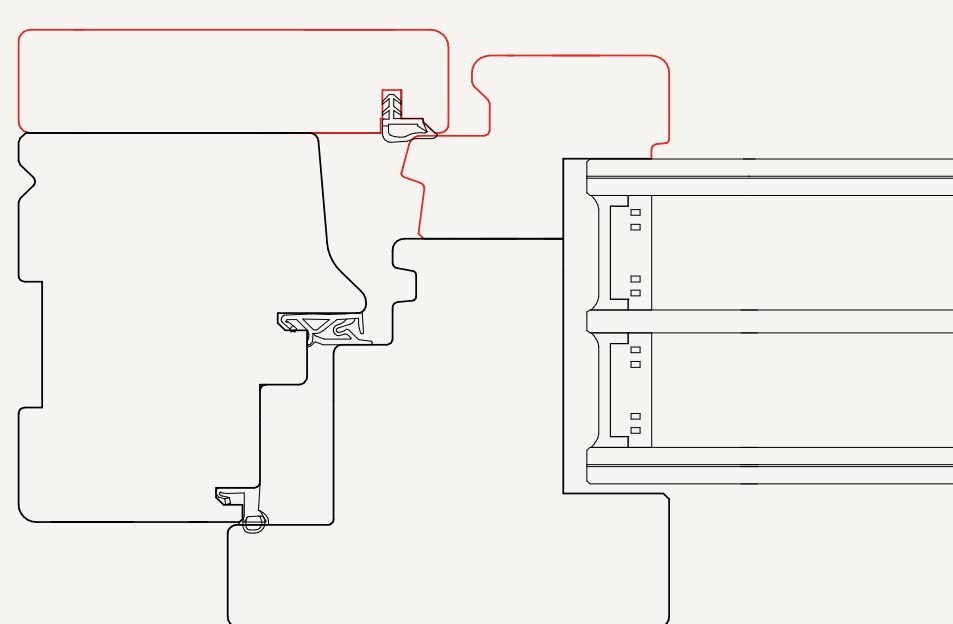

GT standard 68mm  
di spessore con  
tripla guarnizione e vetro  
camera da 28mm

Rima da 86mm o 100mm una  
tipologia serramento che  
permette di raggiungere  
un' elevata classe energetica.

La sua principale  
caratteristica è la possibilità di  
unire due diverse tipologie di  
essenze di legno o finiture  
delle sezioni interne ed  
esterne del serramento.

Innova permette di non  
preoccuparsi più della  
manutenzione esterna del  
serramento grazie al  
rivestimento in alluminio.

# GT

Il modello GT è la finestra da 68mm realizzabile con profilo quadro, inclinato o barocco. Su questo modello vengono installate tre guarnizioni e vetri mono camera.

# Rima

Modello rima, studiato per raggiungere un' elevata coefficienta energetica del serramento, inoltre è stato eliminato il listello ferma vetro ottenendo una linea pulita ed elegante con possibilità di utilizzare differenti essenze e finiture nella parte interna ed esterna del serramento. Rima 86mm permette di montare vetri mono camera o doppia camera fino a 46mm di spessore. Rima 100mm monta un vetro doppia camera fino a 56mm di spessore.

Un ulteriore vantaggio di questo sistema è la possibilità di rimuovere il telaio esterno senza disinstallare il serramento per un eventuale manutenzione o ripristino futuro della parte più esposta alle condizioni climatiche.

# Innova

Modello Innova, un serramento che unisce due differenti materiali, legno all'interno e alluminio all'esterno.

La parte esterna e quella interna sono unite tra di loro con un sistema di giunzione meccanica

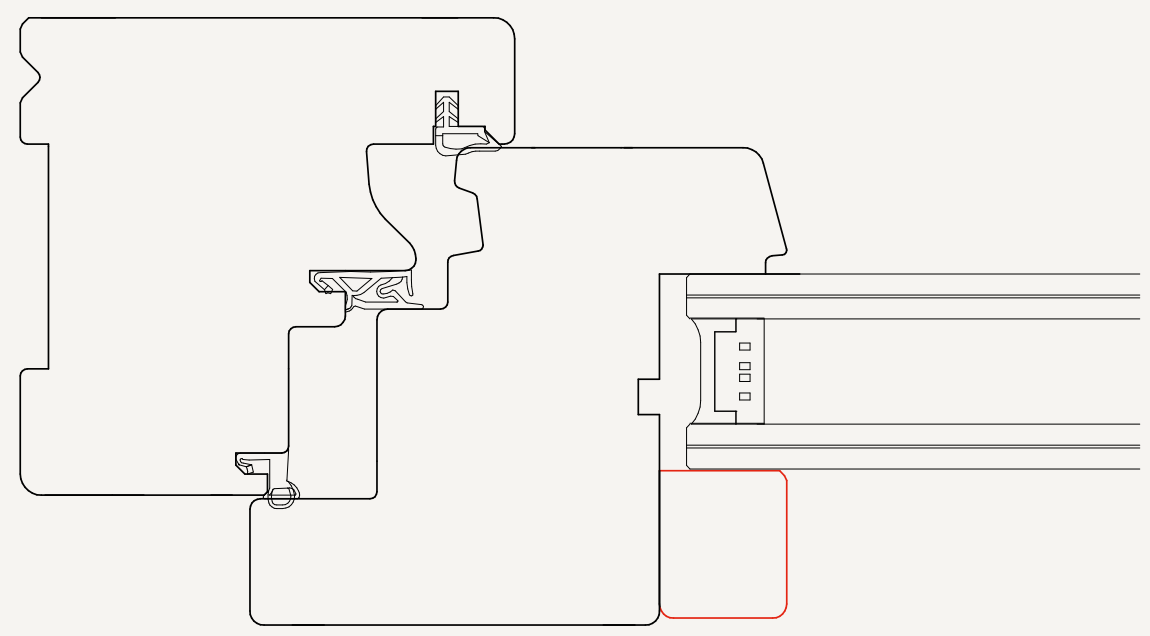

rimuovendo il listello ferma vetro. Oltre consentire colorazioni diverse tra interno ed esterno, il rivestimento in alluminio allunga la durata del serramento in condizioni particolarmente esposte.

Innova permette di montare vetri con doppia camera fino a 50mm.

# CRAZY WINDOWS

By Veneri

Le Crazy Windows sono state progettate tenendo conto di esigenze nuove al passo con i tempi e non ancorate al vecchio concetto di forma, per osare di più con il gusto del bello e della novità che appassiona.

Proprio per questo le Crazy Windows possono essere installate in ogni ambiente della casa per essere in armonia con l'arredamento e dare un tocco di classe e di modernità sia all'interno che all'esterno, mantenendo la qualità e l'isolamento delle finestre tradizionali.

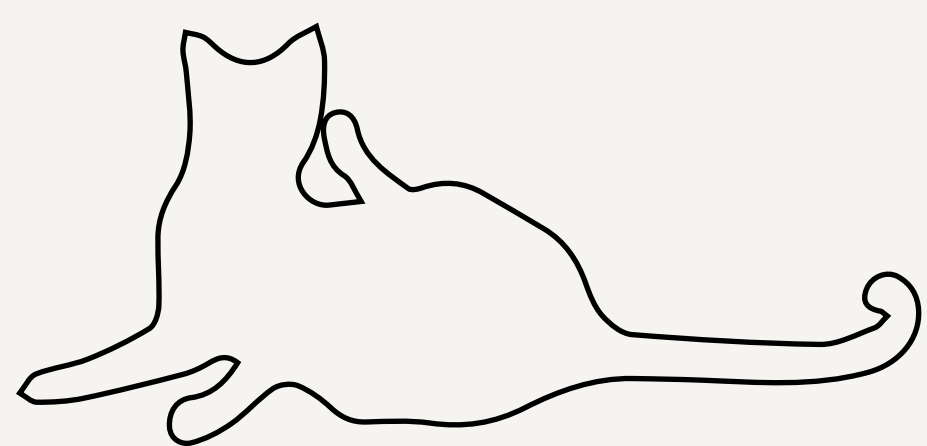

Le finestre possono essere costruite in tutte le essenze e le tipologie che la Falegnameri Veneri è in grado di proporre e in tutte le colorazioni (anche miste) che vanno dai laccati alle tinte legno, usando sempre prodotti ecologici di alta qualità.

La Falegnameria Veneri inoltre è in grado di offrire un supporto tecnico-informativo professionale come: disegni in scala, campionature e quant'altro serve ad accompagnare il cliente alla scelta più appropriata per soddisfare ogni sua esigenza.

# COLLEZIONE EMOTION

Emotion è la definizione dell'idea che ha portato alla creazione di questa collezione.

L'originale tipo di lavorazione da vita al disegno creando sull'anta un gioco di ombre, che cambia a seconda dell'angolazione e della luce che illumina la superficie; dando un effetto quasi tridimensionale e quindi emozionale.
