URN SIZING CHART

One pound of body weight = One cubic inch of cremated remains plus 10 cubic inches for good measure

Elevating Memories Pet Edition

The pet edition is a perfect memorial to cherish and honor your pet's life. Elevating Memories creates a unique textured print that features images and text you can touch and feel.

Due to limitations of computer screens and color printers, the color of a product may vary from its photograph.

Personalize Your Pet's Urn

CUSTOMIZING YOUR URN: We take pride in being able to provide you with a personalized experience. If you have a personal image, design, or multi-sided printing request not shown in our catalog, our design specialists will ensure your urn exceeds expectations in honoring the memories of your pet.

CLIP ART: Please note printing is not limited to photos only and clipart/icon requests are acceptable.

PROOF PROCESS: This collection series requires a 'proof approval' through your funeral director. A 'proof approval' ensures you receive a perfectly curated product that meets your expectations and takes the element of surprise out of the purchase. The design specialists will create your urn and send a preview or 'proof' layout. Once the proof is approved, we will personalize and ship your urn promptly.

PHOTO DISCLAIMER: We will print any photo you wish. However, a quality image is essential to producing a quality product. Please be aware the quality of the original photo will be directly represented in the final product. We highly recommend using the highest resolution photo possible. This includes sending original photos, not screenshots. We need a minimum of 300 dpi for scanned and digital photos.

The Serenity Collection displays custom full-sided textured printing. Our in-house design team can curate a pet memorial with your personal photo or designed with paired images to memorialize your pet. Our catalog shows various designs to help inspire your perfect urn.

Due to limitations of computer screens and color printers, the color of a product may vary from its photograph.
