

One Simple Sign Saves Baby

*A Pro-life resident from Kailua keeps her 40 Days For Life **Pray To End Abortion** signs in her front yard all year around. One day she encountered a young lady walking down her street with a little one in a stroller. It was their first meeting, and they shared where each other lived.*

The lady with the stroller pointed to a house on the opposite side of the street, and the other lady pointed to the house with the Pro-life sign in the yard.

At that moment the atmosphere of the encounter changed.

The young mother, now in tears, said that when she found out she was pregnant she had contemplated getting an abortion. but because of seeing that sign, day after day, month after month, she began to have a change of heart and gave birth to her baby.

In the stroller beside her was her 4 month old "Miracle" baby girl who was given life because of a powerful message emanating from a simple sign. The young mother expressed that she always wanted to meet whoever lived in that house to thank them and let them know that she kept her baby because of the Pro-life sign. And now, due to a "chance" meeting she was able to do just that.

Since then. the mother and the resident have become friends, and the mother is now a Pro-life advocate.

Stories like this is why our Respect Life Committee at St Joseph's continues to participate in 40 Days for Life, including walking once a week, year round.
