

Please note the name of your treatment for mild to moderate active ulcerative colitis has changed from:

**Mezavant XL (mesalazine) 1200 mg
Gastro-Resistant Prolonged-Release Tablets**

To

**Zyduco® XL (mesalazine) 1200 mg
Gastro-Resistant Prolonged-Release Tablets**

Zyduco® XL 1200 mg tablets contain the **same active ingredient in the same amount** as Mezavant XL (mesalazine) 1200 mg tablets and are therefore considered equivalent.

Please continue to take Mezavant XL (mesalazine) 1200 mg tablets as prescribed by your doctor until you run out. As the Zyduco® XL 1200 mg tablets will be the same strength, then just continue with the Zyduco® XL 1200 mg tablets.

Your Zyduco® XL 1200 mg tablet pack will contain a Patient Information Leaflet, which will answer many of the questions you may have about your new tablets. Your Doctor or Pharmacist should also be able to give you a patient guide which contains further information or you can download it at: <https://www.zydusuk.com/zyduco-XL-Patient-Area>

On receiving your first Zyduco® XL 1200 mg tablets prescription you should carefully check the dosage instructions on the dispensing label. You should also just request repeat prescriptions in the same way as when you took the Mezavant XL (mesalazine) 1200mg tablets.

If you have any concerns, please contact the surgery, or discuss with your pharmacist.
