InfoPoint

Live tracking

Locate and follow your business' vehicles and drivers in real time using any internet-connected device with our Google-backed maps.

Daily vehicle log

Review all individual journeys made on any given day by vehicle. See 'start' and 'finish' times, distance travelled and idling time for each trip.

Daily route map

View every route that your drivers travel on a day and examine each data point of the journey, marked for direction and speed.

Configuration

- Vehicles: View, edit and manage your vehicles

- Company: Maintain your company contact details and data retention period

- Users: Create, edit and manage users of the Quartix system

- Groups: Create, edit and manage your vehicle groupings and allocations.

Custom locations

Identify and name locations that your vehicles visit frequently, so that you can easily see them listed in reports and on the live tracking map.
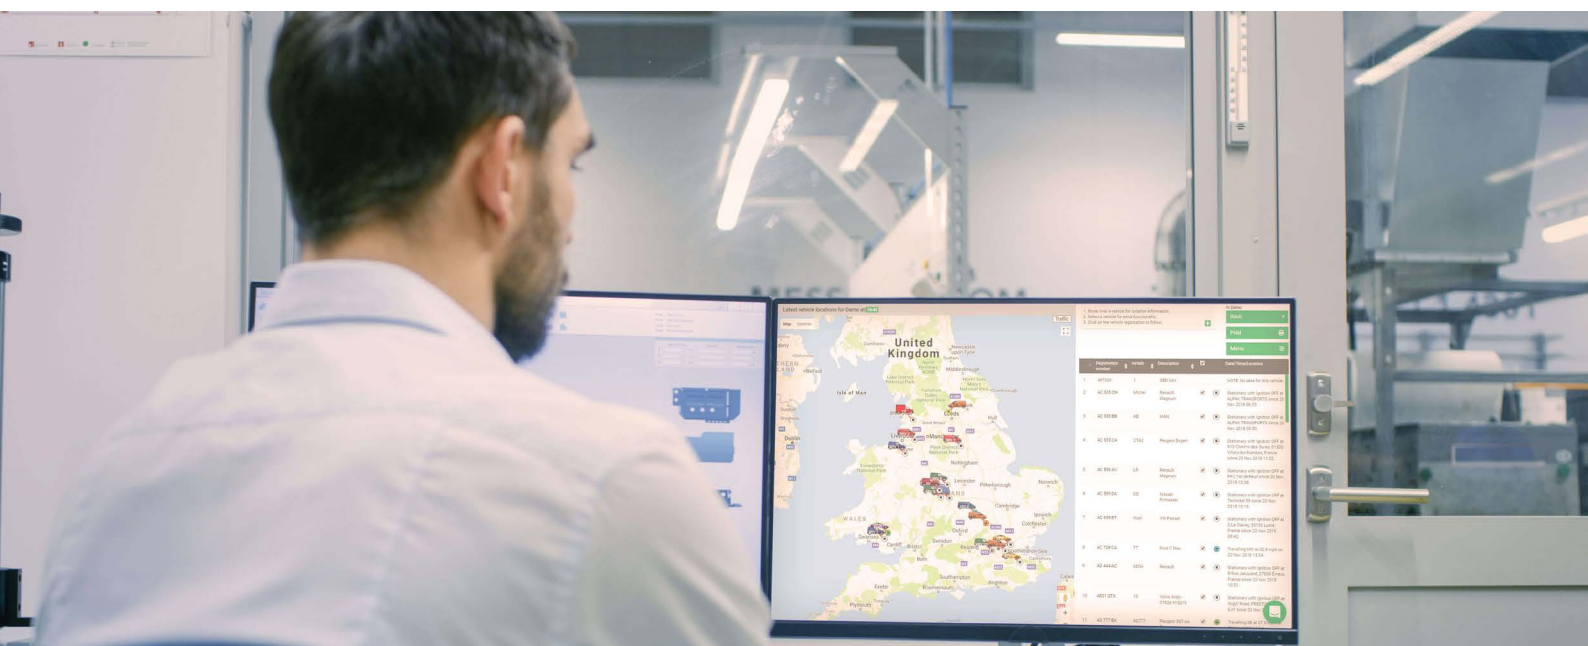

Mobile app

Download the free Quartix mobile app to access real-time data for your vehicles. View driver route maps and driver behaviour from any device while you are away from the office.

Privacy app

Drivers who have been given admin permission can turn the tracking app off. These miles will be recorded as private, with no identifying information.

Unlimited logins

There is no limit to the number of times you can log on to the system or the number of times you can download reports.

InfoPlus

Time on site

See which of your vehicles have visited a specific site in a chosen period, and the time each spent there.
Route chart - Review your fleet's activity in any selected week clearly plotted on a map, allowing you to see route inefficiencies and overlaps.

Route chart location

Specify an area and see which vehicles crossed into that zone during a selected time period, displayed on a map.

Monthly utilisation

Understand fleet usage and identify vehicles that are under-utilised.

Monthly mileage

View the monthly mileage for each vehicle or group of vehicles. This report can include or exclude private mileage.

Daily driving briefing

See driving scores that reference the driver's speeds for the day, plus their acceleration and braking profiles.

Driving style league table

Compare driver behaviour scores across a group of vehicles or the whole fleet.

Speed analysis

Dig further into speeding events across your fleet and identify problem areas.

Driving style trends

Identify driving style trends over a period for a driver or a vehicle and evaluate progress.

Battery status report

Look at the latest readings for your vehicles when they were last stationary and see if the voltage readings are low or even critical.

MOT/service dates

Record important milestones for your vehicles, such as inspection dates or insurance renewals. Set reminders for when deadlines are approaching or overdue.

Daily vehicle group report

Get a daily report for each group of vehicles sent to your email. This report includes key management information such as mileage, fuel usage, maximum speeds and the time spent at sites.

Trip reporter

Review your fleet's total mileage, driving hours and idling time over a specified period. This can be run for individual vehicles, groups of vehicles or the whole fleet.

Geofencing

Create an unlimited number of geographical zones and establish rules for whether your vehicles need to be in or out of them during specific times. Receive alerts if those rules are broken.

Dashboards

Get an overview of your fleet's operations in real-time. Set utilisation targets and receive alerts if those are not met within a specified time.

Privacy controls

Decide when each vehicle is tracked and when it is not tracked by defining monitoring hours.

Out of hours

Review any fleet mileage that is accrued outside of your defined hours of monitoring.

Driver configurations

View, edit and manage driver ID tags

Add-on Features

Temperature monitoring

Record temperature data for your climate-controlled vehicles with integrated temperature probes. See this information in monitoring reports and on the live tracking map.

Driver ID

Use a key fob reader with your tracking device. When a unique key fob is placed on the reader, the tracker will record data against the appropriate driver.

Dashcam integration

Capture footage of your drivers' trips with an integrated dashboard camera. View this footage directly from the vehicle tracking daily route maps.

Dashcam requests

Request dashcam footage for a particular time or event via the tracking system's menu.

Fuel card integration

Integrate your fuel card information into your Quartix reports with FleetCheck.
