

Easy to design, Easy to buy & Easy to install

LAUNDRY CHUTE SYSTEMS

easy -
Line

This brochure includes all parts required to install a laundry chute in a domestic home. Please check our door brochure to decide which door suits your requirements. Our sizes in this brochure are for a Ø300mm chute (Ø12") which is our most common size and along with Ø250mm is a stock item. We can also provide Ø350mm and Ø400mm with a lead time of around 1-2 weeks depending on what is happening in the world.

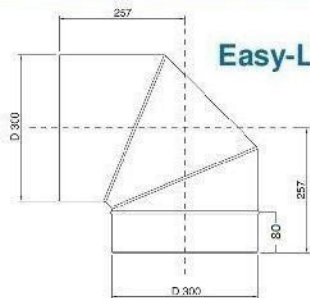

The chute parts are male/female which are easily inserted into each other to have a seamless snag free laundry chute. Our adjustable extensions come in several lengths allowing the installer to set the chute at the exact height required.

If you are unsure of how much you require or how the chute goes together, please email or call us and we will be happy to advise the most cost-effective system for your home.

EFFECTIVE AS OF

No more messwith our Laundry Chute Systems!
