

# City Centre installation proves its value with outstanding year-one results

**Over performance in the city centre - small but impactful**

Installed in the heart of Manchester, the solar PV system has delivered a strong first year, outperforming forecasts and confirming the value of high-quality design and installation.

Across its first 11 months, the system has produced almost the full projected annual yield, demonstrating both reliability and exceptional generation performance. The installation remains in excellent condition and continues to deliver consistent on-site savings.

**Overperformance in the city centre - small, discreet & impactful**

**80x Q Cells Q PEAK DUO BLK M G 115 Solis S5 GC25K inverter & Sunfixings bespoke mounting design**

**Offsets tonnes of CO<sub>2</sub> each year and supports compliance with low-carbon standards**

## system benefits

- Exceptional generation performance and early over-delivery on annual yield
- Supports Manchester City Centre sustainability commitments
- Reliable system operation with minimal maintenance demands

The system achieved nearly 100 percent of its annual generation target within 11 months. This early over-performance highlights the long-term financial and operational value of a well-engineered solar solution.
