

BECAUSE DAYS MATTER

- ✓ In Speed of Diagnosis*
- ✓ In TAT
- ✓ In the Lives of Patients

OUR MISSION

TRANSFORM HEALTHCARE THROUGH DIGITAL SOLUTIONS & SERVICES

ABOUT GESTALT

Gestalt transforms healthcare through PathFlow®, an intelligent, configurable, and vendor-agnostic digital workflow with fully-integrated custom Artificial Intelligence solutions, AI image analysis, and machine learning. Coupled with our professional IT services, healthcare entities will increase accuracy, improve efficiency, and optimize workflow to achieve faster and more accurate patient outcomes.

ELEVATING DIGITAL HEALTHCARE

Gestalt offers all-inclusive pathology for the full breadth of digital pathology adoption which includes: AI solutions to aid in patient diagnosis* and pharma/drug development, complete workflows that support dynamic research and clinical use, and seamless interoperability facilitating data exchange across the healthcare infrastructure. Gestalt sells directly into health systems and labs, as well as to competitors seeking to fill menu gaps and workflow solutions. Leading pathology AI companies partner with Gestalt for its comprehensive suite of workflow capabilities and distribution channels.

- ✓ **Transforming Pathology:** PathFlow® platform enables scalability, global access, AI integration, sharing, and archival for clinical, research, and education purposes.
- ✓ **Leveraging AI:** Custom solutions enabling faster turnaround times, improved accuracy, biomarker discovery, faster drug development, and precise matching of drugs to patients.
- ✓ **Gestalt's Customers:** Healthcare systems, laboratories, pharmaceutical companies, academic institutions, medical research, and pathology & physician groups.

*Research Use Only (RUO) unless following CAP guidelines for LDT.

WHY CHOOSE US?

Digital Workflow Solution

- Pathologists use the fully-integrated PathFlow® platform in clinical routine to diagnose* and share slides
- Research & life sciences facilities use the platform to conduct studies
- Adoption of digital pathology enables AI deployment

Artificial Intelligence

- Increase speed & accuracy of diagnosis*
- Enables development of advanced biomarkers
- Access from within the native digital pathology environment

Professional IT Services

- Specialized integration team deals with complex technical infrastructure of LIS, EMR, EHR, slide scanners, and databases
- Vendor-agnostic offering for scanners & AI
- Consultation projects lead to upselling of workflow & AI
