IVAS

Applications

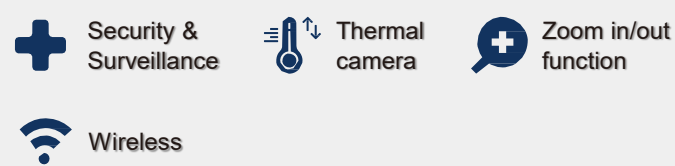

- Fusion of Night vision sensor, thermal sensor, and laser rangefinder
- In fusion mode, can be 0 millilux moonless starlight
- AI low light enhancement
- Strong light suppression
- Thermal: <40mk, QVGA or VGA high resolution
- 1k< Laser Rangefinder
- Supports wireless transmission
- MIL-STD-810G

Thermal Scope

Applications

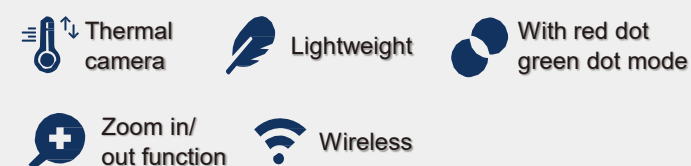

- Thermal: <40 mK, QVGA or VGA high resolution
- 1x-8x digital magnification
- Support wireless transmission
- Can operate in total darkness
- Passive device, detecting without harming
- MIL-STD-810G

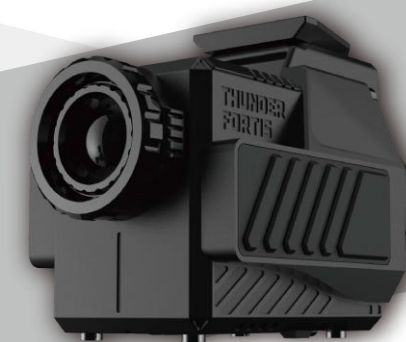

Red Dot Gun Sight

Applications

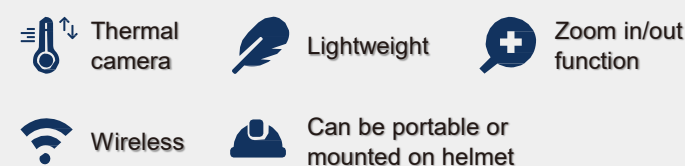

- Thermal: <40 mK, QVGA or VGA high resolution
- 1x – 8x digital magnification
- Viewing window for quick targeting
- AI image recognition assisted targeting
- Support wireless transmission
- Can operate in total darkness
- Passive device, detecting without harming
- MIL-STD-810G

Thermal Monocular

Applications

- A camera combines high magnification (1x – 8x) and video recording
- No Jello effect
- Support wireless transmission
- Can operate in total darkness
- Passive device, detecting without harming
- MIL-STD-810G
