

## Room Darkening Shade Waiver

### **Client Acknowledgement of Room Darkening/Blackout Shade Products:**

-I (client) understand and acknowledge that there will be light gaps on the left, right, and bottom of my blinds, shades, or shutters

### **Cellular Shades:**

- I (client) understand that the most narrow width measurement will be ordered to ensure a proper functioning lift and lower, resulting in light gaps on the left, right, and bottom of the shade.

### **Rolling Shades & Products**

- I (client) understand that there is a  $\frac{1}{4}$ " to  $\frac{3}{8}$ " light gap on one side, and a  $\frac{3}{8}$ " to  $\frac{3}{4}$ " light gap on the lift system side

-I (client) understand that if the header of my window frame is not square, the installer may need to shim the shade down to ensure a proper functioning shade, resulting in a larger gap above the headrail on one side

**BLINDS COUTURE**  
WINDOW COVERINGS FOR EVERYDAY SPACES

**BLINDS • SHADES • SHUTTERS • DRAPERY**

### **Shutters**

- I (client) acknowledge that shutters will still allow some light to filter through the louvers
- I (client) acknowledge that shutters may also allow light gaps on all 4 sides if the shutter is an inside mount (sits inside the window frame) shutter with no trim.

Receipt of this email acknowledges that you (client) fully understand what light gaps are and that all blinds, shades, and shutters sold will have light gaps and light leakage. If you have any questions or concerns, please reach out to your Design Associate to discuss this further.
