## PREPARATION NOTICE AND REQUIREMENTS FOR TREATMENT OF FLEAS

Flea Treatment for: \_\_\_\_\_

Service Date: \_\_\_\_\_ Service Time: \_\_\_\_\_

- (1) Thoroughly vacuum carpeting, baseboards, & upholstered furniture and cushions (Dispose of vacuum bag). Mop or vacuum all hard surface floors - any throw rugs should be washed.
- (3) If you are planning to have carpets cleaned, this should be done **BEFORE** the flea treatment to avoid removing the residual insecticide.
- (4) Cover any exposed food.
- (5) Pet should have flea treatment the same day of service. Pet bedding should be laundered in hot soapy water or replaced. Remove and wash pet's bowls and toys.
- (7) Empty all litter boxes and **DO NOT REFILL** until treatment is completed.
- (8) Fish bowls and aquariums may remain if properly covered.
- (9) If pets are allowed in bedroom and on the bed, these linens should be washed. Articles from under the bed should be placed on top of the bed and closet floors vacuumed and free of boxes, shoes, ect.
- (10) Owner and pet should remain away from home approx. (6) hours. Owner may return home 2-3 hours after treatment to ventilate. (Open or crack windows) to help allow chemical to dry. An odor may linger after treatment, this will diminish and is not harmful.
- (11) If pet spends time in the garage, clean the garage and sweep or hose down concrete floor.
- (12) Vacuum car if pet rides in it.
- (13) Newly emerged fleas will be eliminated as they hatch and contact the residual insecticide that was applied to the carpeting and floors, therefore, it is normal to sometimes see fleas several weeks after treatment.
- (15) Normal vacuuming should be resumed day after treatment and daily vacuuming is highly recommended for several weeks after treatment to reduce flea population. Frequently disposing of vacuum bag also helps to eliminate any fleas recurring in the house.
- (16) Frequent grooming of pet may also help reduce flea population.
