

THE INTERNATIONAL REGISTER OF FETAL MORPHOLOGISTS

Applicant feedback form

Name: Cherie Qualls

Company name: Covance

Assessment type/Date: Rat Fixed heads / 10/21/16

Overall did you find the assessment easy or difficult?	This evaluation was a little more difficult due to not being able to perform the slices.
Were there any parts of the assessment that 'worked' better than others?	The oral walk thru of the specimens worked very well. Even though the slices were pre-cut.
Were the questions clear enough?	Yes.
Did the protocol explain clearly what was expected of you in the assessment?	Yes.
Did you receive sufficient information prior to the assessment/ was the supporting paperwork clear and informative? (e.g. application form)	Yes.
Was the format of the assessment explained clearly to you/ and in a logical sequence? (on the day)	Yes.
Could anything have been done to improve the format/content of the assessment?	If there was a way to perform the slices yourself that would be great. The pictures of the head slices, if some of them can be with the mandible removed, they would be better for the people who cut that portion off.
Based on your experience would you recommend the assessment to your colleagues?	Yes. Definitely.
How did this assessment compare to previous assessments (if applicable)	Compared to the Rat and Rabbit Skeletal assessment, this one was more difficult.
Any other comments	However with this evaluation it allows for more interpretation of what you are seeing.

Thanks!

Comment. I Am happy that the Assessments are being conducted at the near 1A meeting.
