

# ENVIRONMENTAL POLICY

Redfrost is committed to providing services which promote sound environmental practices.

We are committed to the prevention of pollution and ensuring our clients meet their legal and policy requirements by outlining environmentally sound practices. This shall include all aspects of the project including the office environment and environmentally sound designs and construction practices.

Continual improvement to our environmental management system will enable continued success of our business while maintaining the reputation of our clients.

Redfrost will achieve our objectives by:

- Adopting and promoting the requirements of ISO 14001 and the continual development of our environmental management system;
- Promoting awareness and maintaining compliance with this policy, client's requirements, relevant laws, regulations and standards;
- Maintaining awareness of industry improvements and opportunities;
- Engaging contractors and suppliers who promote sound environmental practices;
- Promoting design and construction practices which minimise or recycle materials and efficiently use resources.

This will only be achieved through the participation, co-operation and commitment of everyone in the workplace.

Redfrost's policy will be made available to interested parties and its effectiveness will be monitored. Annual reviews of the policy will be undertaken.
