

CARE & MAINTENANCE INSTRUCTIONS

Spot & Spill Removal Instructions

1. Remove any excess spilled material quickly but carefully. Do not rub it in!
2. Blot the spot or spill with a white absorbent towel. DO NOT SCRUB!
3. If spot is dry, Pre-Vacuum in and around the spot thoroughly
4. Apply our Wool-Safe Approved Fiber ProTector SPOT REMOVER to spot or stain
5. Allow to dwell on the area for 5-10 minutes
6. Blot spot with microfiber or white cotton towel. DO NOT SCRUB!
7. Repeat Steps 4, 5, & 6 if necessary
8. Contact us as soon as possible for spots & stains that cannot be removed with the above treatment.

General Care Recommendations

- Follow all applicable care instructions and guidelines provided by the manufacturer.
- DO NOT use household cleaners or bleaches on treated items/areas. Doing so may interfere with the protective treatment and could irreversibly discolor the area & permanently damage the fabric or fibers.
- Vacuum Regularly! This is most important thing you can do to keep the dirt, soil, & other contaminants from damaging your carpets, upholstered furniture, & area rugs.
- Deep extraction cleaning of the protected item should be performed every 2-4 years at our Professional Rug Cleaning Facility as we use professional-grade, eco-friendly cleaning products and professional rug cleaning equipment & systems that will not remove the protector.
