

# Berkeley Habitat Mission Center

## The Transformational Vision

Habitat for Humanity of Berkeley County is launching its most ambitious project yet - the Berkeley Habitat Mission Center. This 21,816-square-foot facility will serve as the heart of our operations, bringing together our administrative offices, ReStore, warehouse, and construction space under one roof to better serve families in need of safe, affordable housing.

## The Community Goal: The Cornerstone of Impact

We are launching a community-wide campaign to secure the cornerstone support needed to bring this vision to life. With key funding secured, this critical investment will establish a permanent home for our mission and expand opportunities for families throughout Berkeley County.

## The Investment: \$5.1 Million

This transformative project represents a \$5.1 million investment in our community. It will fund land acquisition, construction, & essential infrastructure allowing us to double our homebuilding capacity over the next decade.

### Investment Opportunities:
