

Press Release

3S Automation & Service GmbH Announces Strategic Collaboration with PH Facility SAGL

Date: July 14, 2025

Location: Lugano

3S Automation & Service GmbH (3sautomation.eu), a leading innovator in automation solutions, is excited to announce a strategic collaboration with PH Facility SAGL. By focusing on cutting-edge technologies and customer-oriented solutions, this partnership aims to combine the strengths of both companies to drive innovation in supply chain automation and improve the efficiency of logistics operations.

Benefits of the Collaboration

The collaboration between 3S Automation & Service GmbH and PH Facility SAGL offers numerous advantages for both companies and their clients. Together, they can:

- **Innovation and Advanced Technology:** By combining 3S Automation's expertise in automation solutions with PH Facility's experience in management and maintenance, clients will gain access to state-of-the-art technologies that enhance operational efficiency.
- **Customized Solutions:** The partnership will enable the delivery of tailored solutions that meet clients' specific needs, significantly improving logistics and management processes.
- **Sustainability:** Both companies are committed to promoting sustainable solutions. This collaboration will strengthen the offering of services and products that reduce environmental impact and support responsible business practices.
- **Support and Assistance:** Clients will benefit from continuous support and dedicated assistance, thanks to the combined resources and expertise of both companies.

Statements

"We are thrilled to collaborate with PH Facility. This partnership will allow us to offer comprehensive automation and packaging solutions that enhance efficiency and sustainability for our clients. 3S

Automation's portfolio will now also include PH Facility's services and solutions," said Marco Infausto, CEO of 3S Automation.

About 3S Automation

With advanced technologies and a carefully selected ecosystem of partners, 3S Automation helps organizations automate processes and improve the efficiency of their logistics operations.

Unlock the Potential of Logistics Automation: Rethink the Supply Chain

In today's fast-paced digital world, efficient and streamlined logistics operations are essential for success. By automating various aspects of logistics, businesses can save time, reduce costs, and enhance customer satisfaction. Logistics automation improves operations through software that replaces some human-managed processes or through machinery that handles manual tasks.

About PH Facility SAGL

PH Facility SAGL offers a unique range of solutions in the context of advanced industrial processes and Facility Management for industry, healthcare, and large civil infrastructures. This includes engineering and construction of automation plants, maintenance in highly innovative systems, environmental services focused on recovery solutions aligned with modern European standards, and information technology dedicated to personalized consulting and efficient business management.

The continuous consolidation of the brand and a widespread presence in both national and international markets-alongside a strong focus on human capital-are the key assets enabling PH Facility to consistently deliver the most innovative solutions in the broad Italian and European service market.
