PROFESSIONAL®

Innovative micro-perforated fiberglass material, ideal for baking. Its micro-perforated texture ensures even heat distribution and moisture release, reducing baking times and delivering excellent results. Suitable for both sweet and savoury creations, including tarts, pastries, leavened products and crisp bases. The non-stick moulds can be used on both sides for empty or filled tartlets. Temperature range: -40°C to +230°C.

Why choose the Airplus range?

- Ideal for all kind of batters, pastries and doughs: perfect for sponge cakes, shortcrust, flaky textures, puff pastry and yeasted dough.
- The dough remains inside the micro-perforated mould cavity and does not leak out.
- Non stick mould that makes unmoulding easy and perfect without leaving waste behind.
- The mould can be used on both sides to prepare shortcrust pastry or brisée pastry shells and stuffed tartlets
- High fat cake doughs could slightly leak out from the base of the mould during baking, ensuring in any case an excellent final result.

AIRPLUS® STRIPS

Practical and functional micro-perforated strips ideal for baking shortcrust pastry for tarts and leavened pastry. Airplus Strips take advantage of the technology of the fiberglass texture, which makes the strips completely non-stick. The micro-holes allow a uniform diffusion of the heat for a perfect baking and an quick unmoulding without the necessity of greasing them. Airplus Strips are ideal for an easy stocking in the lab. The strips are washable and reusable. 5 pcs set. Temperature range: - 40°C + 230°C (-40°F +446°F) .
