JUNE

Community Health Screenings and Preventive Care

Did you know that Amity Medical Group regularly provides free public health screenings in the community? Our next event will be on June 20th at the Juneteenth Festival of the Carolinas, where our clinical team will offer screenings for key health indicators including blood pressure, oxygen levels, glucose, weight, eye health, and ear health. Preventive healthcare is essential because it helps identify potential health concerns early, often before symptoms appear, allowing patients to take proactive steps toward better health and stay in control of their wellness. We look forward to seeing our community there and continuing to make care more accessible for all.

END THE STIGMA

CHARLOTTE KNIGHTS BANANA BALL + RAIN AIDS WALK 2026

In May, Amity participated in the Charlotte Knights Banana Ball as a staff appreciation event, providing tickets for our team to enjoy time together outside of the clinic, and we had so much fun celebrating and connecting as a staff. We also proudly participated in the RAIN AIDS Walk as sponsors, joining many of our community partners in walking to end stigma and support awareness. Each year, participants are invited to complete “I walk for” cards to honor who or what inspires them to take part in the walk, creating a meaningful and personal way to show support for the cause.
