With a multitude of glass designs, options and door styles to choose from, our Door Glass range allows you to personalise your home effortlessly.

The entrance to your home is important, because first impressions really do count. We believe it's important that your door reflects your personal taste, style and character to a tee.

Inspirational, beautiful and the ultimate in stylish practicality, our Door Glass Collection has been created to provide you with a wealth of choice to enhance your composite door and create a first impression that speaks volumes.

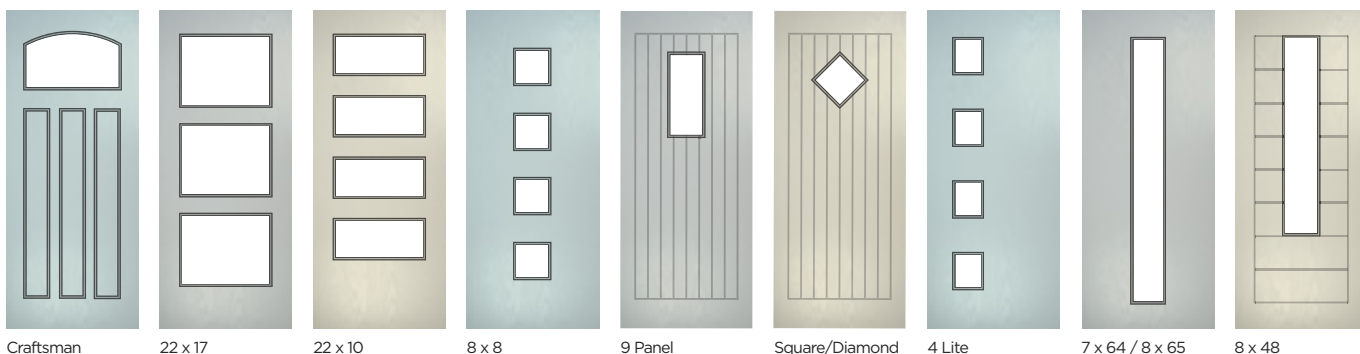

With over 20 years experience in the decorative glass market, we've brought together a stunning range of contemporary and traditional glass options to suit most tastes, budgets and homes.

You can expect the unexpected too. Our ethos for innovative design and uncompromising quality has transformed the way doors are perceived, enjoyed and used. Take our built-in Venetian blinds; uncluttered, elegant and functional.

All products are manufactured to conform to high quality standards and come with a full 10 Year Manufacturer's Guarantee.

PAGE 102

Build your Product Specification

As the only door glass manufacturer in the UK with the ability to assemble all types of decorative glass units to order, it is possible to have your insulated glass unit built to the exact specification required.

With upgrades available for Low E, P1A laminated glass, changes to backing glass and units up to 52mm in thickness, the options are almost limitless.

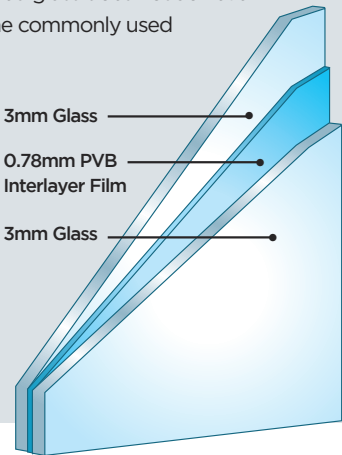

Security+ [-S-]

Since 1st October 2015, Approved Document Q in England has set security requirements for new dwellings in England. The equivalent standard in Scotland is Building Standard 4.13. The approved document sets out reasonable standards for doors and windows to resist physical attack by a casual or opportunist burglar.

A door that has been tested to meet the security requirements of PAS 24 is required to meet ADQ. This standard requires the use of glass which achieves a minimum of class P1A when tested to EN356. Toughened glass does not achieve this standard, nor does the commonly used 6.4mm laminated glass.

Our Security Plus optional glass, which features two panes of 3mm float glass and a 0.76mm pvb interlayer, achieves BS EN 356 Class P2A – one class higher than P1A.

A

B

C

D

E

F

G

All doors using Energy+ achieve a minimum 'B' rating

Energy+ [-E-]

From June 2022, revisions to Approved Document L state that all non-timber doorsets used in replacement situations need to achieve a U value of 1.4 or below. For all doors, this requires the use of Low E glass and 90% argon filled in most glazing configurations. With our Energy+ specification, the centre pane U Value of all our glass options achieves a minimum of 1.5, which when combined with a 44 standard foam filled composite door slab will meet and exceed the Building Regulations. Our Energy+ units are manufactured with Pilkington K low emissivity glass and are Argon filled.

Choosing the Right Thickness

There are now a multitude of glazing thicknesses in the market dependant on type of door and the cassette manufacturer being used.

The complete range of products, with the exception of Gridlites and Blinds, are available in either 24, 26 or 28mm as standard or as 36, 38, 42, 48 and 50mm as special **-T-** units.

The Thickness of the glass unit is determined by a combination of door thickness and glazing system used.

Glass Unit Specifications		DoorCo	ODL	Distinction	Door-Stop	RegaLead	RegaLead
		FLiP	TriSys	NanYa	-	Urban	Inox
44mm Standard Composite	DoorCo, Capstone, Distinction, DoorCo Gripcore	26mm	26mm	24mm	24mm	26mm	38mm
48mm Timber Core Composite	Solidor, Endurance, Future Products	28mm	28mm	-	-	28mm	42mm
54mm Timber/Composite	DoorCo, Capstone, Distinction, DoorCo Gripcore	36mm	36mm	-	-	36mm	48mm
68mm Composite	Capstone, DoorCo	50mm	50mm	-	-	50mm	-
70mm Composite	Distinction	-	52mm	50mm	-	52mm	-

Extra Thick [-T-]

The complete range of decorative glass (except Blinds and Gridlites) are now available in 'Extra Thick' units above the standard 28mm maximum. These triple or quadruple glazed units are designed glazing into thicker timber and composite doors.

All Extra Thick units are available with both our Energy+ and Security+ upgrades which can achieve U values as low as 1.1.

RL units are constructed as quad units with the decorative leaf offset closer to the front of the IGU.

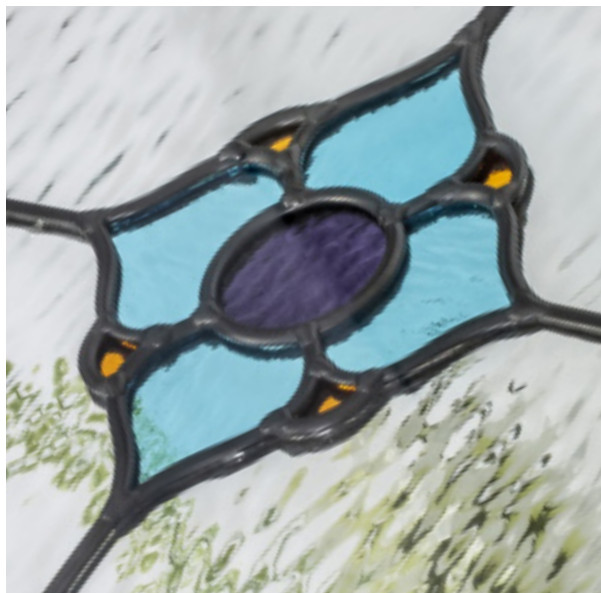

DDP units are constructed as triple glazed units with the decorative leaf centred in the IGU.

Signature

R A N G E

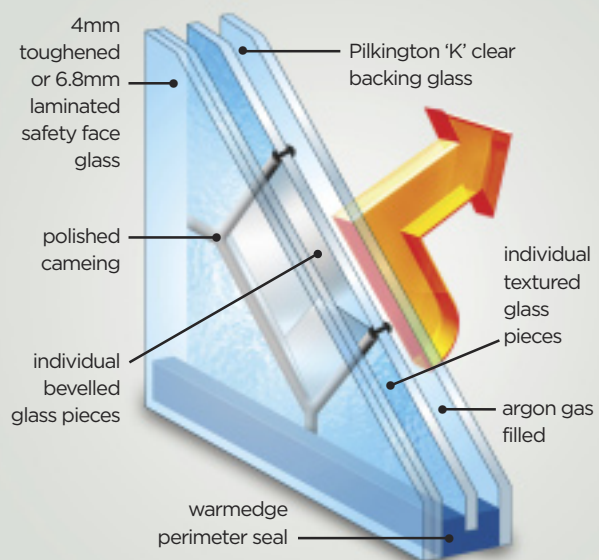

Our range of Signature triple glazed units are constructed using hand-cut bevels and beautifully textured glass pieces, which are assembled using traditional stained glass methods into zinc or brass comes.

The decorative glass is then encapsulated between two pieces of tempered safety glass to give excellent thermal and sound insulation with the added benefit of an easy to clean, smooth surface.

- > All Signature Premium and Premium Plus units are supplied with Energy+ as standard
- > No need to specify textured backing glass
- > All units are triple glazed for easy cleaning and extra security
- > Changes to glass types or came colours is not possible
- > Fully customised sidelights and toplights are available on a limited range of designs
- > Complementary and composite sidelights are available on the entire range

Dorchester

SIGNATURE PREMIUM PLUS RANGE

Genuine coloured Spectrum Glass with blackened comes combine to create this stunning leadlight design, reminiscent of the Victorian era. With Dorchester, you can now have all the benefits of traditional leadlights, with the performance and thermal properties you would expect in your door.

Prairie

SIGNATURE PREMIUM RANGE

Simplicity, balance and exceptional quality. The purity of this linear range draws its inspiration from Frank Lloyd Wright, one of America's greatest architects. Hints of cubism come together with leading edge glass technology to create a wonderful multi-textured finish and a surprisingly contemporary design.

Zinc Star

SIGNATURE RANGE

Simple in design, Zinc Star combines glue chipped star bevels with a zinc cameing. The decorative bevelled elements stand out from the neutral obscure glass that surrounds them in striking fashion.

Etch

A R T R A N G E

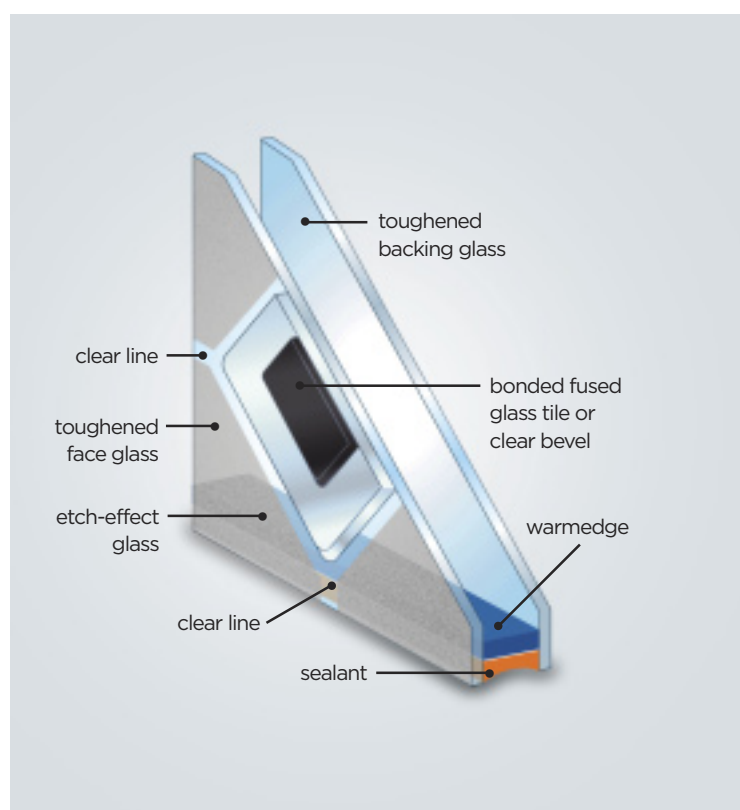

Our Etch and Fusion glass range offers a combination of privacy, whilst maintaining high levels of light transmission. Using a range of subtle etch techniques combined with clear or semi-transparent areas, our Etch glass designs cover both traditional and contemporary styles and are a very neutral decorative glass option.

Our unique Tahoe and Murano designs are a stunning combination of etched glass with fused glass elements which are bonded to the glass surface.

- > Etch glass designs are all available as custom sidelights - limitations apply
- > Etch glass designs come as double glazed units as standard
- > Etch glass designs are recommended to be installed with the design to the outer face

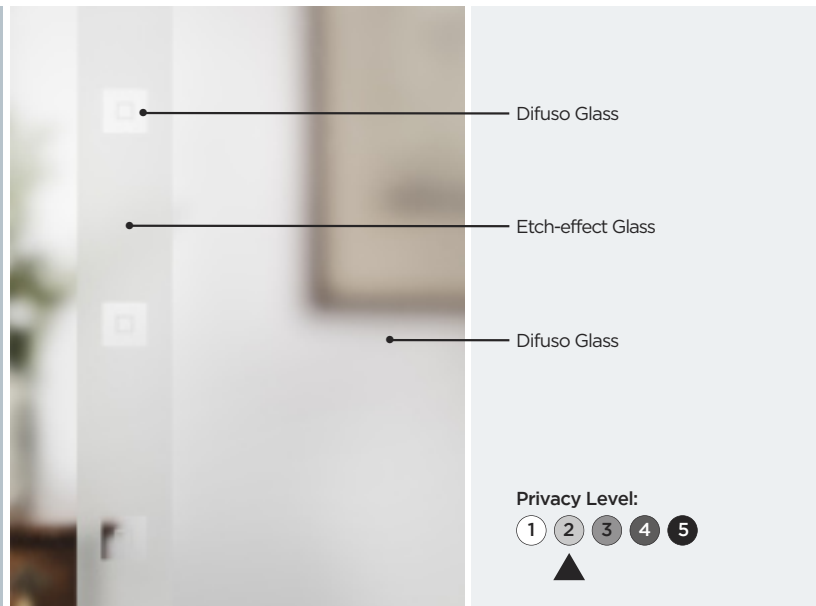

Greenwich

ETCH ART RANGE

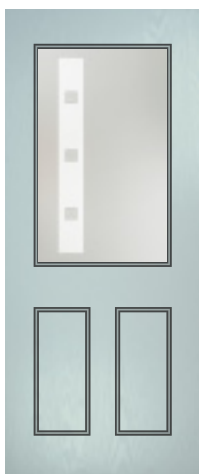

The concentric squares inside a band of sandblasted glass is a subtle and more simplistic take on our hugely popular Tahoe design. The Difuso glass, against which the sandblast design is set, ensures high levels of privacy whilst maintaining high light transmission levels.

How to Create your Order Code

When creating codes - the format is as follows: **Alpha Code - Glass Specification Code - Design Style - Font Style** | Eg:

DDP20001-E-D-DEK Half Moon - Energy - Etch on Clear - Dekar

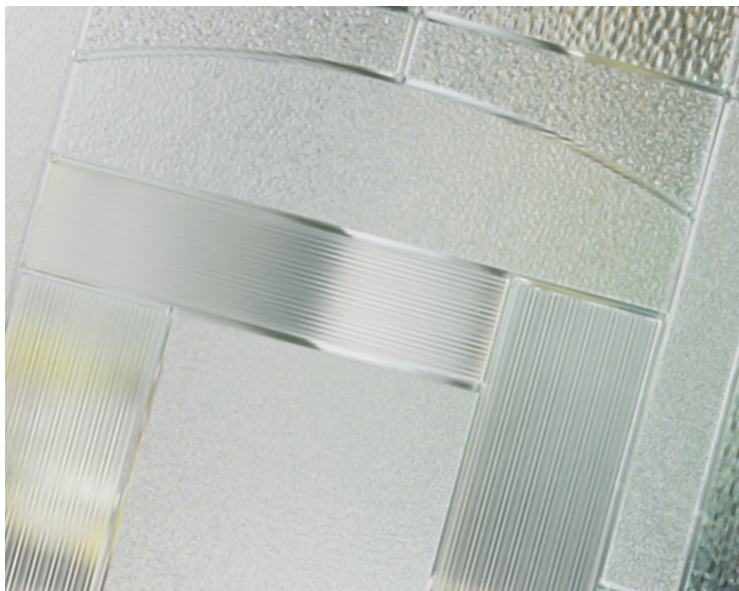

DDP20011-S-E-H-BOD 8x65 - Energy/Security - Vertical Text - Bodoni

Crystal

A R T R A N G E

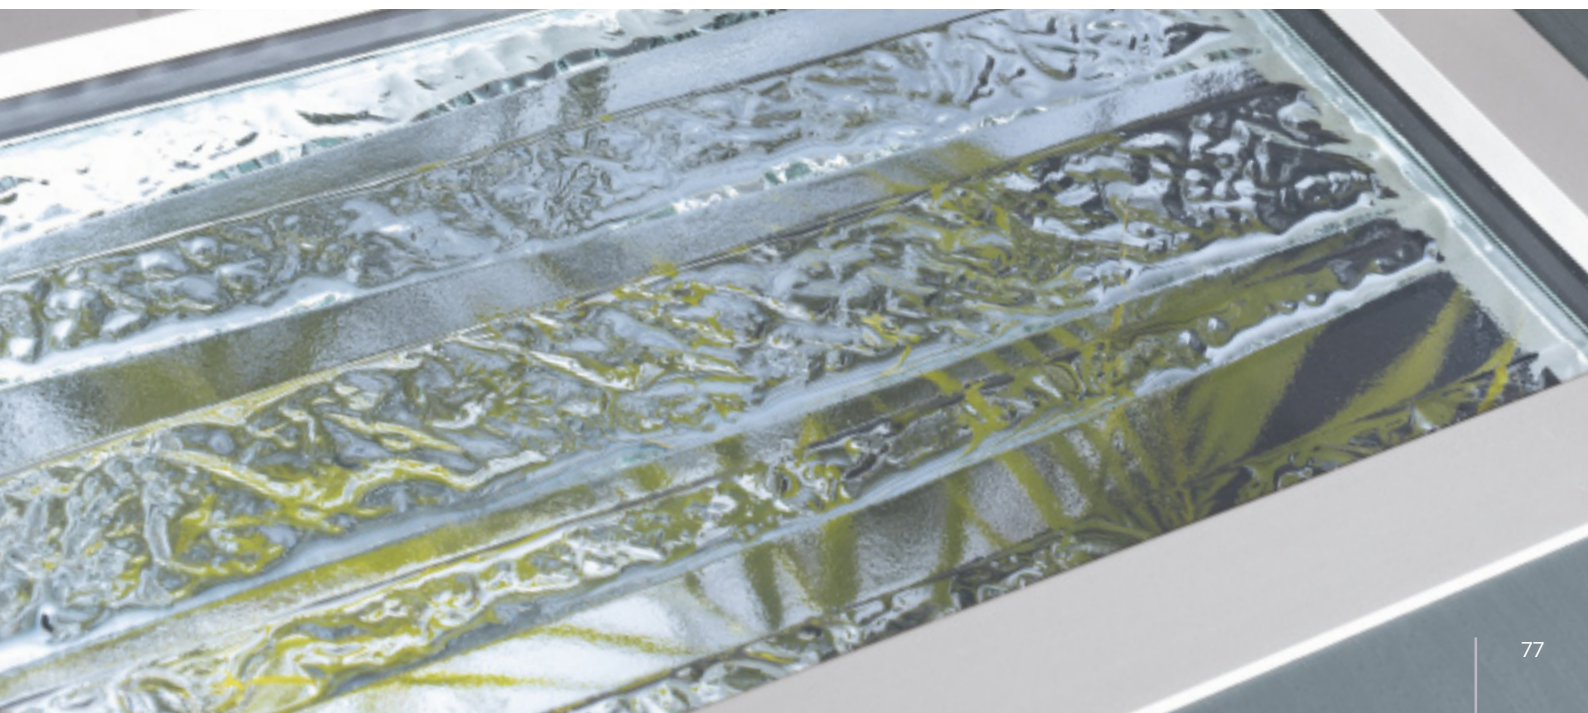

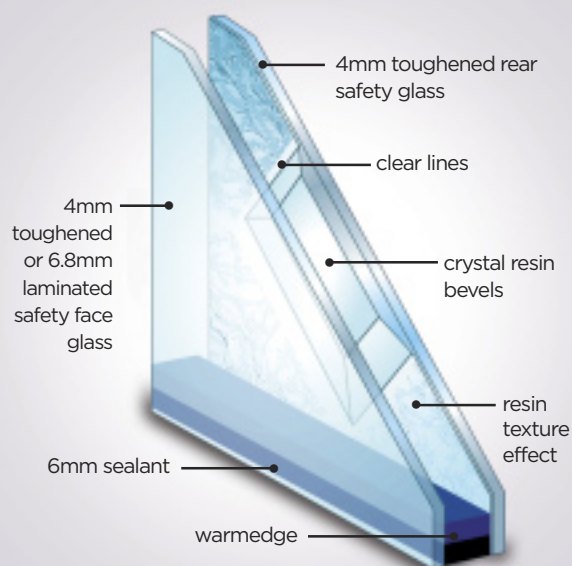

Our range of Crystal Art designs are manufactured using a highly advanced, multi-patented technology, that allows us to create incredibly detailed bevelled effect designs that would be impossible with traditional glass decoration techniques.

The advanced resin system we use to create these stunning range of designs, provide functionality as well as decoration, with sound insulation and breakthrough resistance properties that are unsurpassed.

- > Encapsulated inside a double glazed unit for easy cleaning
- > Stunning bevel effects which beautifully refract the light
- > High levels of privacy with textured glass effects and prismatic bevel effects
- > It is not possible to produce complementary or custom sidelights

Laguna

CRYSTAL CAST RANGE

Inspired by the ripples of sand on a beach, Laguna is a beautiful cast glass design with a truly 3-dimensional effect. The contrasting textures work in harmony with each other and create a decorative glass effect that is striking yet simple. It works equally as well in traditional or more contemporary door designs.

Venetian Blind & GridLite

NON-DECORATIVE OPTIONS

Whether you are looking to create a traditional looking door with our unique GridLite product, control your light with our integral Venetian Blinds, or create a gateway to your garden with our French Door options, these specialist additions to our Door Glass range deliver great aesthetics with guaranteed performance.

- > These options can be integrated into all major door suppliers' products
- > Products for backdoors, French doors and porch door options
- > All products suitable for standard 44mm doors only

Venetian Blinds

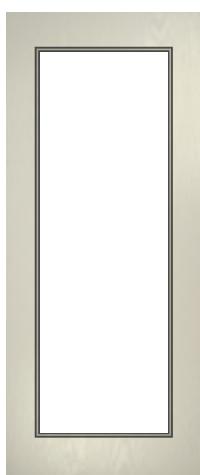

NON-DECORATIVE OPTIONS

Control light and privacy with instant fingertip control when you select an integrated door blind. This Venetian blind is cleverly encapsulated within the insulated glass cavity of this door to provide a zero maintenance blind. The blind can be raised, lowered and easily tilted using the unobtrusive fingertip control on the edge of the frame.

NON-DECORATIVE OPTIONS

These simulated divided lights are complemented by an offset etched glass to maintain privacy whilst maintaining high levels of light transmission. The range of five options cover many eras of housing style, from the late Georgian period through to the 'roaring 20s', yet look equally at place in a modern home.

Custom Sidelights

AND TOPLIGHTS

We offer an unrivalled service for manufacturing custom sidelights and toplites to match many of our most popular decorative glass designs. All sidelights are manufactured using 4mm toughened glass as standard but can be upgraded to Security+ with the use of 6.8mm laminated glass.

Signature Ranges

These are manufactured at our manufacturing plant using exactly the same glass textures and bevelled shapes that are used in the main glass design - no copy compromises. Lead time for Signature custom designs is 6 weeks from design approval.

Etch Art and Fusion Designs

With our own manufacturing facility in the UK, we can create custom glass sizes for all our Etch and Fusion Art ranges. We would recommend that main door glass and sidelights are ordered at the same time to ensure consistency of colour/texture in sandblast or glass colour.

Crystal Art

Due to the manufacturing process involved in creating our Crystal Art range, it is not possible to have custom sidelights or toplights.

The design and ordering process:

1. Send us your sizes and design choice
2. Our sales office will calculate the price based on size and complexity and give current lead times.
3. If main door has already been installed we will require certain datum point information to ensure an accurate line through from main door glass. If the main door has not yet been manufactured we can calculate this for you but will require information from your door prepper/manufacture about sizing and trim of the sash.
4. Our design team will then send a design proposal for approval and sign off
5. Once the unit is manufactured we can deliver to any UK address, whether it be the door manufacturer or the installation site.

Custom Etch Letters & Numbers

SIDELIGHTS AND TOPLIGHTS

As well as manufacturing bespoke etch designs for standard size cassette units, we can also manufacture bespoke sized sidelights and toplights to complement your installation.

The same design styles and customisation available for our standard size units is available for the bespoke sizes and there is a simple order form to specify exactly what you need.

We can also ensure 'line-through' designs to doors that feature the horizontal routed lines in the door skin.

Below shows some of the layout examples. Please speak to a member of the sales team for a full brochure featuring all possible entranceway layouts.

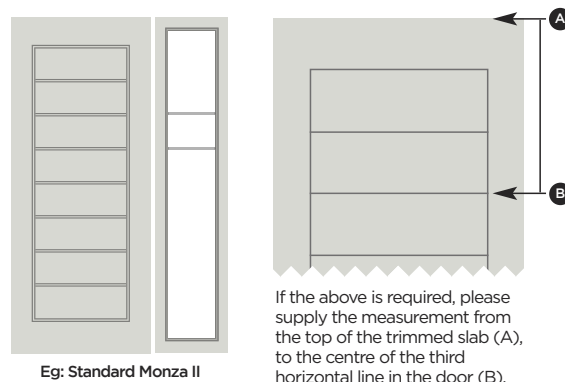

Font Sizing

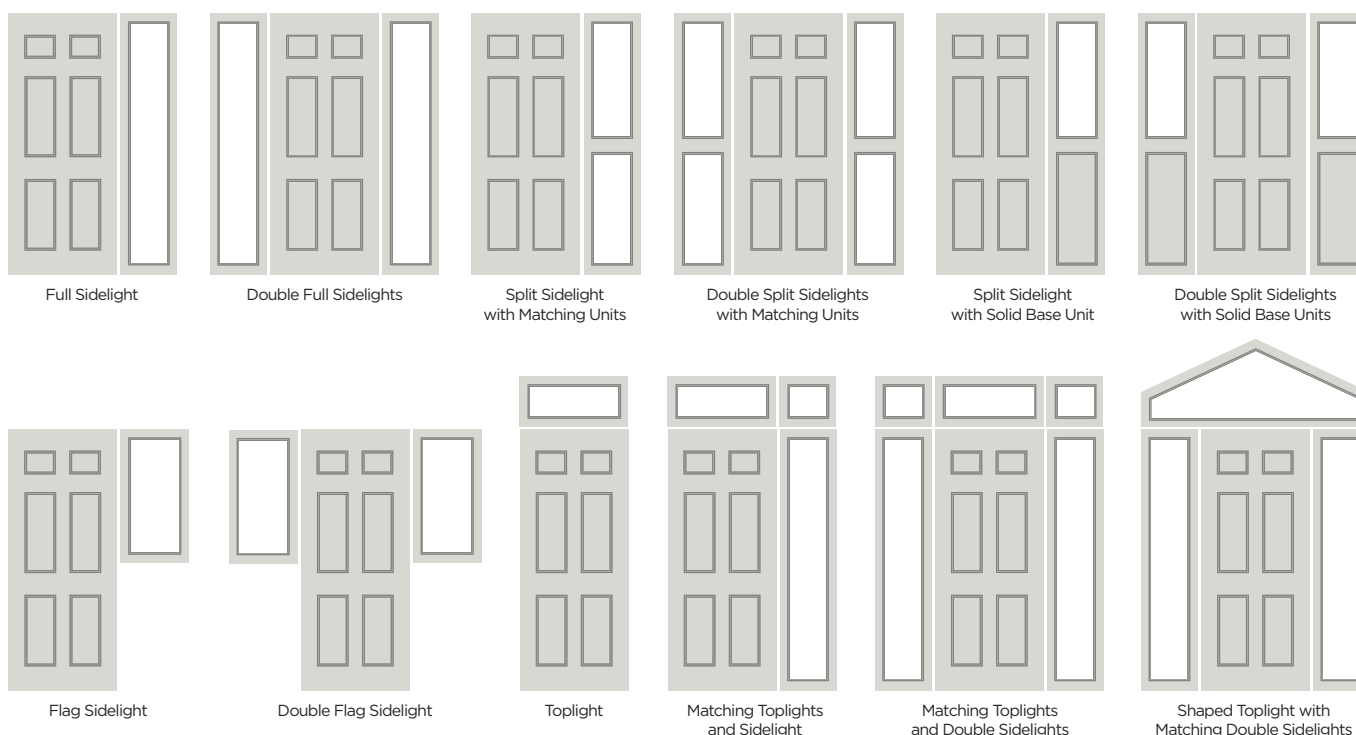

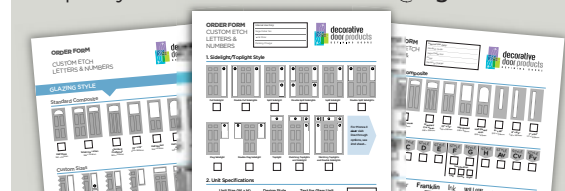

As all custom numbers and names vary in length, font sizes will change dependant on the number of characters used. Customers should be aware that a general rule of thumb is that every 1 inch (25mm) of letter height provides 10ft (3metres) of readability with best impact. Where possible we recommend numbers and lettering (except street names on sidelights) with a minimum of 150mm in height which will make them easily readable from 60ft (18metres). To calculate the size of the lettering we use the following ratio as standard: **Width of the glass (mm), minus 100mm, divided by the number of characters including spaces.**

As all numbers/letters are custom manufactured returns cannot be accepted so please check with your supplier or our sales office before ordering if you have any questions.

Line-Through Sizing

Request your Order Forms from: sales@regalead.co.uk

Decorative Door Glass Configurator

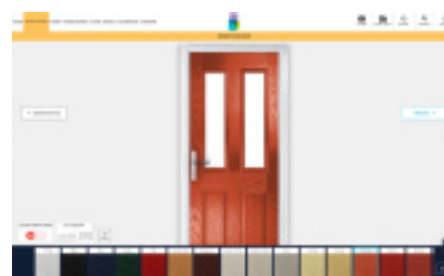

With such a wide selection of styles and glazing options available for your door, it can sometimes be difficult to visualise what you need. Our door glass configurator lets you see just that and even lets you upload a picture of your home to see exactly how your choices will look in reality.

View the full range of decorative door glass on our website at:

www.doordesigner.app/demo/

Step 1: Choose your door style

Step 2: Choose your door colour

Step 3: Choose your frame style and colour

Step 4: Choose your decorative glass

Guarantees, Warranties and Technical Performance

Insulated Glass Quality

All our units are manufactured to the rigorous demands of EN1279, the European Standard for Insulated Glass, and gas filled units have also passed the 1279 Part 3 testing for gas retention. We are also accredited to ASTM 2190 under the Insulated Glass Certification scheme for North America. All our insulated glass units are manufactured using warm edge spacer technology to reduce thermal transfer at the perimeter of the units and come with a 10 year warranty.

Safety Glass Standards

Toughened glass is tested and certified to EN12150 and laminated glass to EN14449 standards. We only supply laminated glass units with 0.78mm interlayer, categorised as P2A under EN379 testing. On Security+, units are suitable for use in Secured by Design doorsets and comply with the requirements of Approved Doc Q.

Signature Range

Our range of Signature products are manufactured by traditional methods with individually hand cut glass surrounded by Brass or lead came and the decorative leaf is then encapsulated between 2 layers of safety glass (either tempered/toughened glass or 6.8mm laminated glass). The glass has been tested to EN12150 and EN14449 as applicable and the overall sealed unit to the EN1279 standard. As these items are manufactured using traditional art glass small seeds or blemishes in the glass are not deemed to be a fault and actually add to the products traditional look. The products are manufactured to exacting standards to reduce the amount of rattle that can occur when a door is slammed. All products are designed to ensure they pass our 50,000 slam test without breaking.

Etch Art Range

Our Etch Art designs are a combination of etched effect glass and hand-made fused glass elements that are bonded using high performance UV adhesives. The decorative leaf is normally the outer pane of an insulated glass unit. In the manufacture of fused glass, small bubbles do occur and are part of the beauty of the product, therefore small imperfections are not deemed as faults.

Crystal Art Range

The range of Crystal Art units are manufactured using technology unique to us and are guaranteed not to crack, yellow or delaminate for a period of 10 years. The manufacturing methods for Crystal Art use liquid resin systems so occasional small air bubbles are inevitable and add to the appeal of the product. Our products have been independently tested in accelerated UV testing chambers with no noticeable change to the product after 10,000 hours. All Crystal Art warranties are based on glazing the resin to the inside (face 3) of the property/unit.

Door Blinds and Shades

The range of Door Blinds are constructed as 26mm and are suitable for both ODL TriSys and DoorCo FLiP cassettes. The blind and shade systems are magnetically controlled and fitted inside the cavity of a certified toughened glass insulated glass unit. The products are guaranteed against discolouration and mechanical failure for 5 years. The products are rigorously tested and in the laboratory are operated through 10,000 cycles to ensure years of reliable operation.
