OUTDOOR BLINDS
THINK OUTSIDE THE BOX

OUTDOOR BLINDS

The Outdoor Blind is the modern alternative for your patio. The hi-tech fabrics manage heat and glare on your patio while maintaining the view. Lower and raise the blind using a removable crank handle or motorise your blind. The blind is secured at the bottom using a choice of hold down clips, which allows the blind to remain down during windy weather. You can also select a Channel X Blind that is fully enclosed on the top and sides or a Wire X system that supports the side of the blind. The Outdoor Blind will allow you maximum use of your external entertainment areas by stopping heat and glare and also providing a degree of weather protection and maintaining your view.
