

CV10 and CV15 Control Valves

The CV10/CV15 are compact, cage-guided valves also known as a dump valves. They are ideally suited for a wide range of applications such as pressure control, level control and flow control. Typical installations include separators, scrubbers, wellheads and other production equipment. The CV10 is a close coupled designed and the CV15 is an open yoke design.

The CV10/CV15's hammer union makes maintenance easy by allowing the topworks to be removed without taking the valve out of line. This feature reduces the amount of time needed to inspect and replace the valve trim.

The CV10/CV15 are available in a variety of material options and different trim sizes. A NACE option is also available for sour service. And for abrasive service for where flows contain high amounts of sand, the CV10/CV15 can be outfitted with a sand body with a replaceable plug.

CV10

CV15

Specifications

Sizes: 1" and 2"

Connections: Female NPT, Flanged, Butt Weld, Socket Weld

Body Type: Globe, Tee (1" only), Angle (2" only)

Trim Characteristic: Quick Open, Modified % (Throttling)

Trim Size: 0.25", 0.375" (3/8"), 0.50", 0.75", 1.00", 1.25", 1.50" (Requires CV10F/CV15F)

Pressure Rating: 4000 psi (-50°F to 200°F), 3755 psi at 400°F

Temperature Range:

CV10 (close coupled): -50° F to 200° F (-46° C to 93° C)

CV15 (open yoke): -50° F to 400° F (-46° C to 204° C)

Shutoff: ANSI Class IV

Actuator Sizes: No. 35 (35 in² area), No. 70 (70 in² area)

Input Signal Ranges: 3-15 psi, 6-30 psi

Materials:

Body: WCC Steel, LCC (Low Temp Option)

Packing Plug: A105 Steel, Nickel Plated, A350 LF2 (Low Temp Option)

Hammer Nut: A105 Steel, A350 LF2 (Low Temp Option)

Trim: 17/4 Stainless, Carbide (Optional)

Actuator Housing: Carbon Steel

Yoke: A395 Ductile Iron
