

GV20 Gauge Valve

The GV20 Gauge Valves are designed to be used with BMD's LG20 Level Gauges but are also compatible with all armored flat-glass level gauges. Union tank connections make for easy installation and removal.

Specifications

Connections:

Level Gauge Connection: 1/2" FNPT
 Tank Connection: 1/2" and 3/4" Union

Features

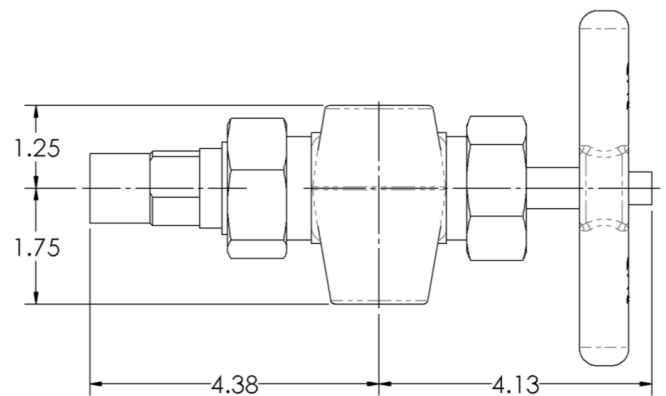

Safety Shutoff: SST ball check upstream of the seat shuts off flow in the event of glass breakage.

Ergonomic Handle: Sturdy 0.75" diameter tee handle for ease of use and comfortable operation.

Offset Design: Body and drain connections are offset from the tank connection for easy glass cleaning.

NACE Compatible: Wetted parts conform to NACE MR-01-75 specifications for sour gas service.
