

April Newsletter Four-Year-Olds

The month of April brings all things spring. We begin our month exploring the signs of spring. We will also have some fun preparing for Easter just before spring break.

When we return from break, the focus will be on the planet Earth as we celebrate Earth Day. We will learn how to keep our planet healthy as we discuss the concept of Reduce, Reuse and Recycle. We will discover how to take recycled materials and create something as a class.

As we watch the spring season unfold around us, we will talk about all the changes in blooming trees and flowers, and emerging bugs. We will plant seeds and watch them grow, and be visited by a beekeeper.

We will conclude the month of April with a visit from the farmer who comes to bring a delivery of eggs to the 4s for the first time this spring. We will learn about the life cycle of a chicken as we wait patiently for the eggs to hatch.
