Mr. Pisano has over 20 years of experience in the engineering, construction and real estate development industry. As a licensed Professional Engineer, Mr. Pisano has experience performing professional engineering evaluations, land development consulting and construction management services on behalf of owners, investors, and commercial lenders.

Mr. Pisano has served in various senior management positions for multiple national building companies and a regional engineering firm. Mr. Pisano is experienced in performing engineering evaluations for residential and commercial structures and his experience makes him well suited to provide consulting services related to site evaluations, due diligence risk analysis, and land development project management.

Bob is very experienced in the permitting and approval processes related to new site developments and has experience managing construction projects. Pisano Development Group provides “on-call” services to assist residential owners and commercial lenders with the administration of ongoing construction projects.
