

# Vetted *by* The House Manager

*by* Amy Sharp

**The House Manager**, owned by Cat Theriot, is a home and life management company. “We are here when you don’t know who to call,” says Cat. “We have a team of construction experts at our fingertips that we have vetted for you. I can tell you, many contractors did not make The House Manager list after working in my own home!”

Cat met ProRoofs Restoration owner Henry Viesca through a local BNI (Business Networking International) chapter. “I like to test out new vendors,” says Cat. “And a friend had just texted that she had a roof leak. I asked Henry if he could take a look. I was very impressed by his approach, demeanor and professionalism. He gave me a wealth of information about the issue and why it occurred; what went wrong and why. He is very knowledgeable about his profession, and he shares that knowledge. I like to learn why, so that when I go out to houses I can put clients in touch with the correct vendor and not waste anyone’s time. Henry is also thorough, he may know exactly what’s wrong from the ground, but he always gets out the ladder and gets on the roof to double check. Not only does Henry know roofs, he is able to educate people on the ins and outs of their insurance. I’m a big proponent of home maintenance...not waiting until it’s broken to fix it. I learned from Henry that roofs work much the same way. No insurance company wants to cover a roof that hasn’t been maintained.”

How long has it been since your roof was maintained? Home inspections and roofing estimates are free of charge at ProRoofs Restoration. Cat’s first roof leak “test” (that is now fixed!) was back in October. Since then, The House Manager and ProRoofs Restoration have worked on multiple projects together. “Whenever it’s gutters or the roof, I call Henry!” says Cat.
