ESTABLISHED 1987 

## SPECIFICATIONS & RATINGS

# FEATURES

Our PVC-profile windows and doors provide exclusive advantages in terms of comfort, peace of mind and satisfaction. Let's take a closer look at what advantages they offer.

1

## MAINTENANCE-FREE FOR LIFE

The window profiles are made from an exclusive, 100% virgin uPVC powder compound that is entirely lead-free. This special compound gives the system better resistance to impact and discoloration. The window profiles are maintenance-free and will not crack, blister or warp.

2

## YOUR CHOICE OF GLAZING

Depending on the model, glazing of different types and thicknesses can be applied (3/8" to 7/8"). Airtightness is ensured by triple or quadruple weather stripping (depending on window model). The glazing bead is designed to withstand extreme conditions, including winds up to 375 km/h (235 mph). Located inside, the glazing bead provides greater security and facilitates any glazing replacement.

3

## NO LEAKS, NO FUSS, NO MOISTURE

Our patented drainage system eliminates water faster and more efficiently than any other system on the market. You no longer have to worry about potential water damage to your windows.

4

## MULTIBENEFICIAL FRAMES

The multichamber profiles have more chambers than any competing product. Transition from hot to cold inside the structure is gradual. Our system provides superior thermal insulation – and the frame is distortion-proof. Multiple air chambers provide excellent sound reduction.

## CROSS SECTION

### FEATURES OF EVERY PRODUCT

#### Multichamber Design

More chambers than any competing product. Providing superior thermal insulation and sound reduction. Guaranteed outstanding resistance to warping and crushing – minimizing the likelihood of seal failure and gas loss.

#### Fusion Welded Corners

Designed to withstand extreme conditions, while giving a more attractive appearance, enhancing solidity, and eliminating the need for adhesives and sealants, while creating a water and airtight seal.

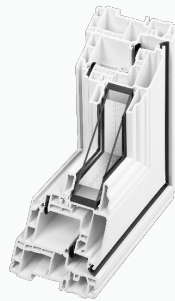

#### Exclusive PVC Compound

Our 3 1/4" (82.5 mm) PVC frame provides the window better with resistance to force impacts and colour discoloration.

### SPECIFIC FEATURES

#### Secure Fastening

This secure, multipoint locking system offers optimum security, excellent sound-proofing, and airtightness. Located around the entire perimeter, our exclusive anchoring system is specially designed with mounting sockets in a minimum of two PVC walls – creating reliable, durable, and secure fastening.

#### Optional

Additionally available in Slim Frame – increasing the glass visibility by 2".

#### Double Layer Gasket Seal

The continuous double polymer compression seals, in combination with our exclusive multilock system, help eliminate air and water infiltration.

#### Triple Layer Weather Stripping

This superior insulation helps virtually eliminate air, water, and dirt infiltration.

# SECTIONS

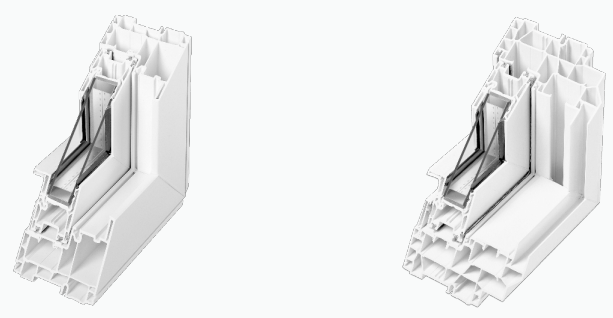

**Interior Glazing Bead**  
This design constitutes a key security feature and allows the window to withstand winds of over 330 km/h (205 mph).

**Double Walls**  
The 2.5mm exterior and interior double walls are among the thickest on the market – making them exceptionally sturdy and increasing sound reduction.

**Customize Efficiency**  
For additional energy efficiency, each product can be equipped with many options, such as standard double low-e argon glass, triple glazing, or with many different types of coating options

Excellent weather, this screws and are fastening.

**Automatic Locks**  
An inclusive anchoring system specifically designed for sturdy automatic locks on sliding products – resulting in a reliable, durable and secure locking system.

ing

stripping helps to er, dust,

**Quad Felt Weather Stripping**  
Felt stripping allows the windows to slide easily, while creating an airtight seal – resulting in reduced heating and cooling costs.

**5 THE ULTIMATE INVESTMENT**  
Superior quality windows preserve your home's long-term structural integrity. These window systems are a value-added feature for your home, with increased comfort, minimal maintenance costs and refreshed style. These all-PVC window systems undergo thorough performance testing to ensure years of trouble-free operation.

**6 DESIGNED TO MAKE LIFE EASIER**  
Depending on the model, Casements open a full 90° and sashes tilt in for easy cleaning. Opening mechanisms and lock parts come in a corrosion-proof finish for greater durability.

**7 SECURITY-MINDED**  
Opening mechanism and high-security multipoint lock parts are firmly fastened in screw boxes and stay secured. The exclusive screws are specially designed for uPVC. All screws install through a minimum of two walls for greater stability.

**8 ATTRACTIVE DESIGN**  
Fusion welding gives a more attractive appearance and eliminates the need for adhesives and sealants. Result: a flawless, 100% watertight and airtight surface. Internal walls are also welded for increased overall structural strength. Inside and outside design accessories.

**9 NO DRAFTS, NO ENERGY LOSS**  
Air, dust and dirt infiltration are virtually eliminated. Result: greater comfort—and lower utility bills. Frame provision prevents the crushing of the bubble weather strip.
