Discover

Design

Plan

Build

Execute

Datacenter Extension Triggers

Hardware Refresh/EOL

Capacity Expansion

Seasonal or Burst Workloads

Hard-to-move-assets remain on-premise

Often aligned with app upgrade/retrofit/re-platform/patch

Same Geo or Remote

HCX: Efficient L2Extension, LAN like WAN

Long-Term Hybridity

Datacenter Replacement Triggers

Datacenter contract up for renewal/Vendor Change

Datacenter Consolidation

Inter-DC Migration; often **same Geo**

Merger, Acquisition or Spin-Off

Priority is Evacuation

Modernise/Transform/Retrofit in the target site

HCX: Like-for-like VM and Network Migration

Rapid Migration

Disaster Recovery Triggers

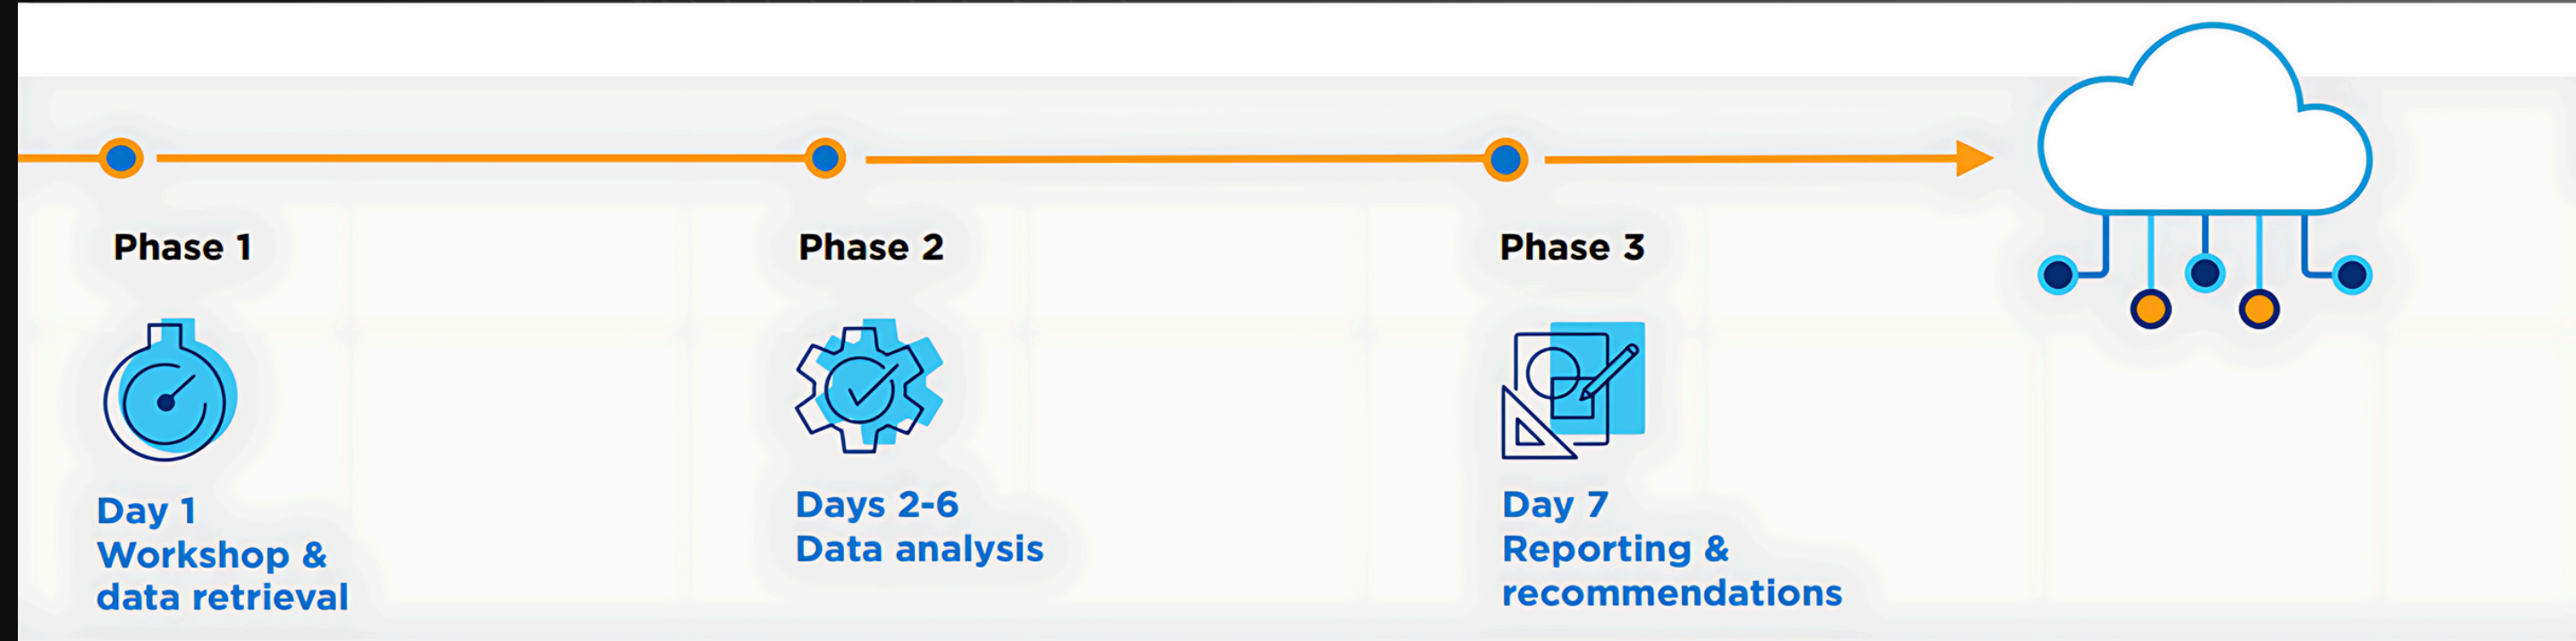

Corporate Governance/Compliance/DR Event/C2C

Replace a Physical DR Site

Geo Anti-Affinity

HCX: Cloud Clone and Seed

OCVS Launchpad

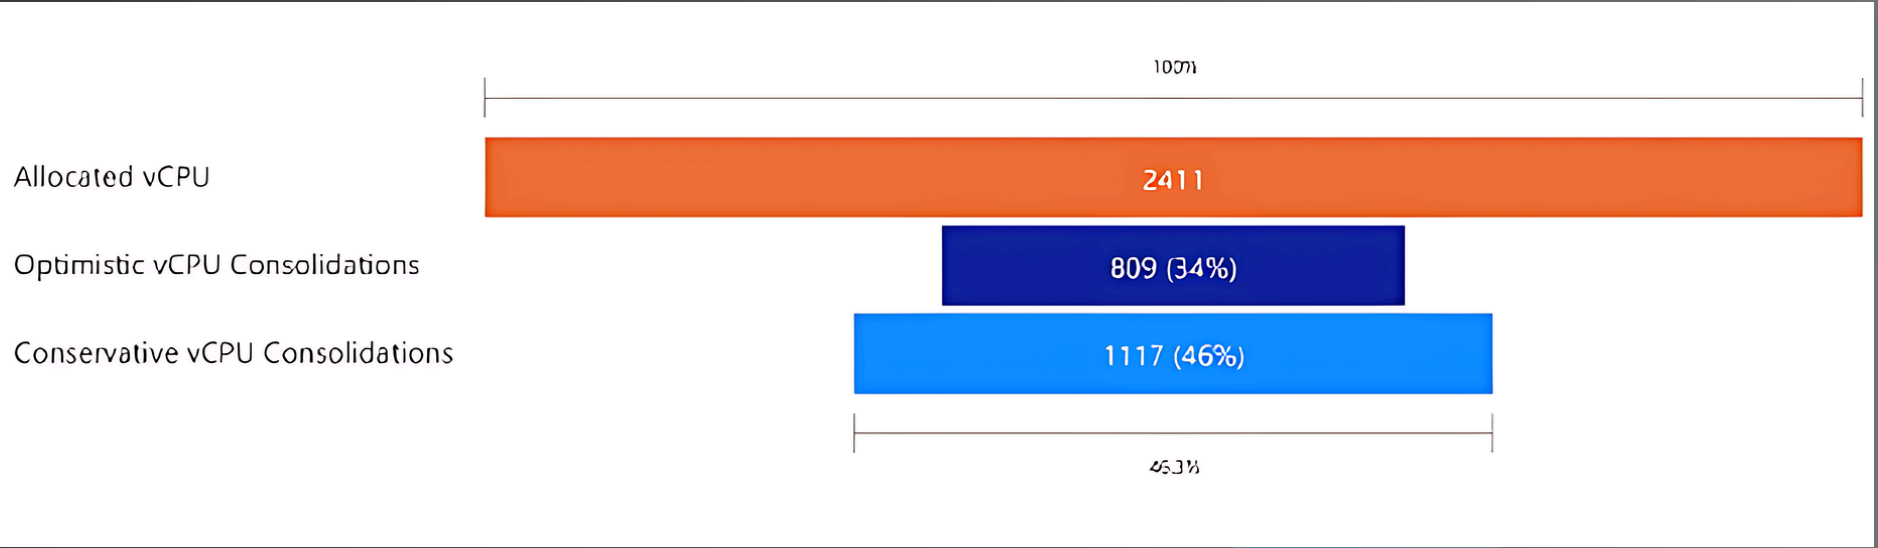

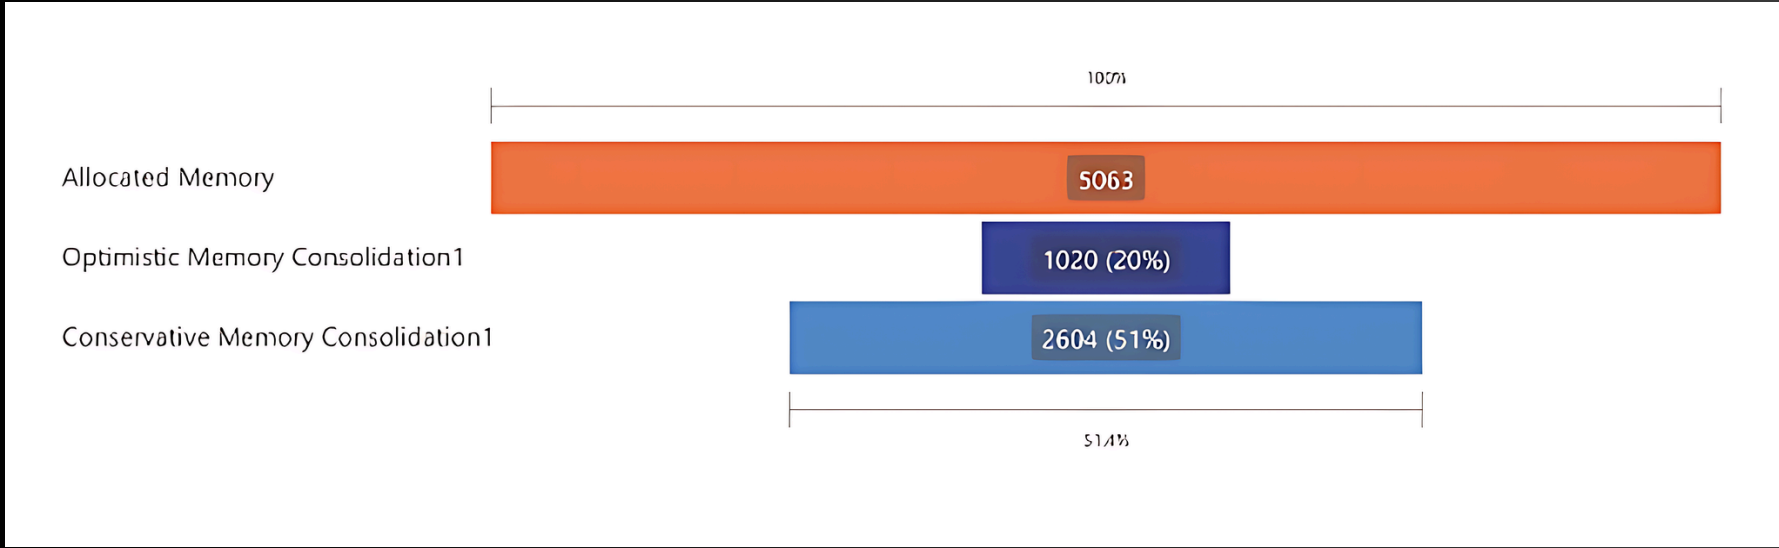

Assess the VMware environment, collect data and identify workloads to migrate.

Target environment sizing on OCVS plus migration and transformation options and recommendations

Defined migration approach and high level TCO of target service, with guidance on best practice and cost savings for OCVS adoption

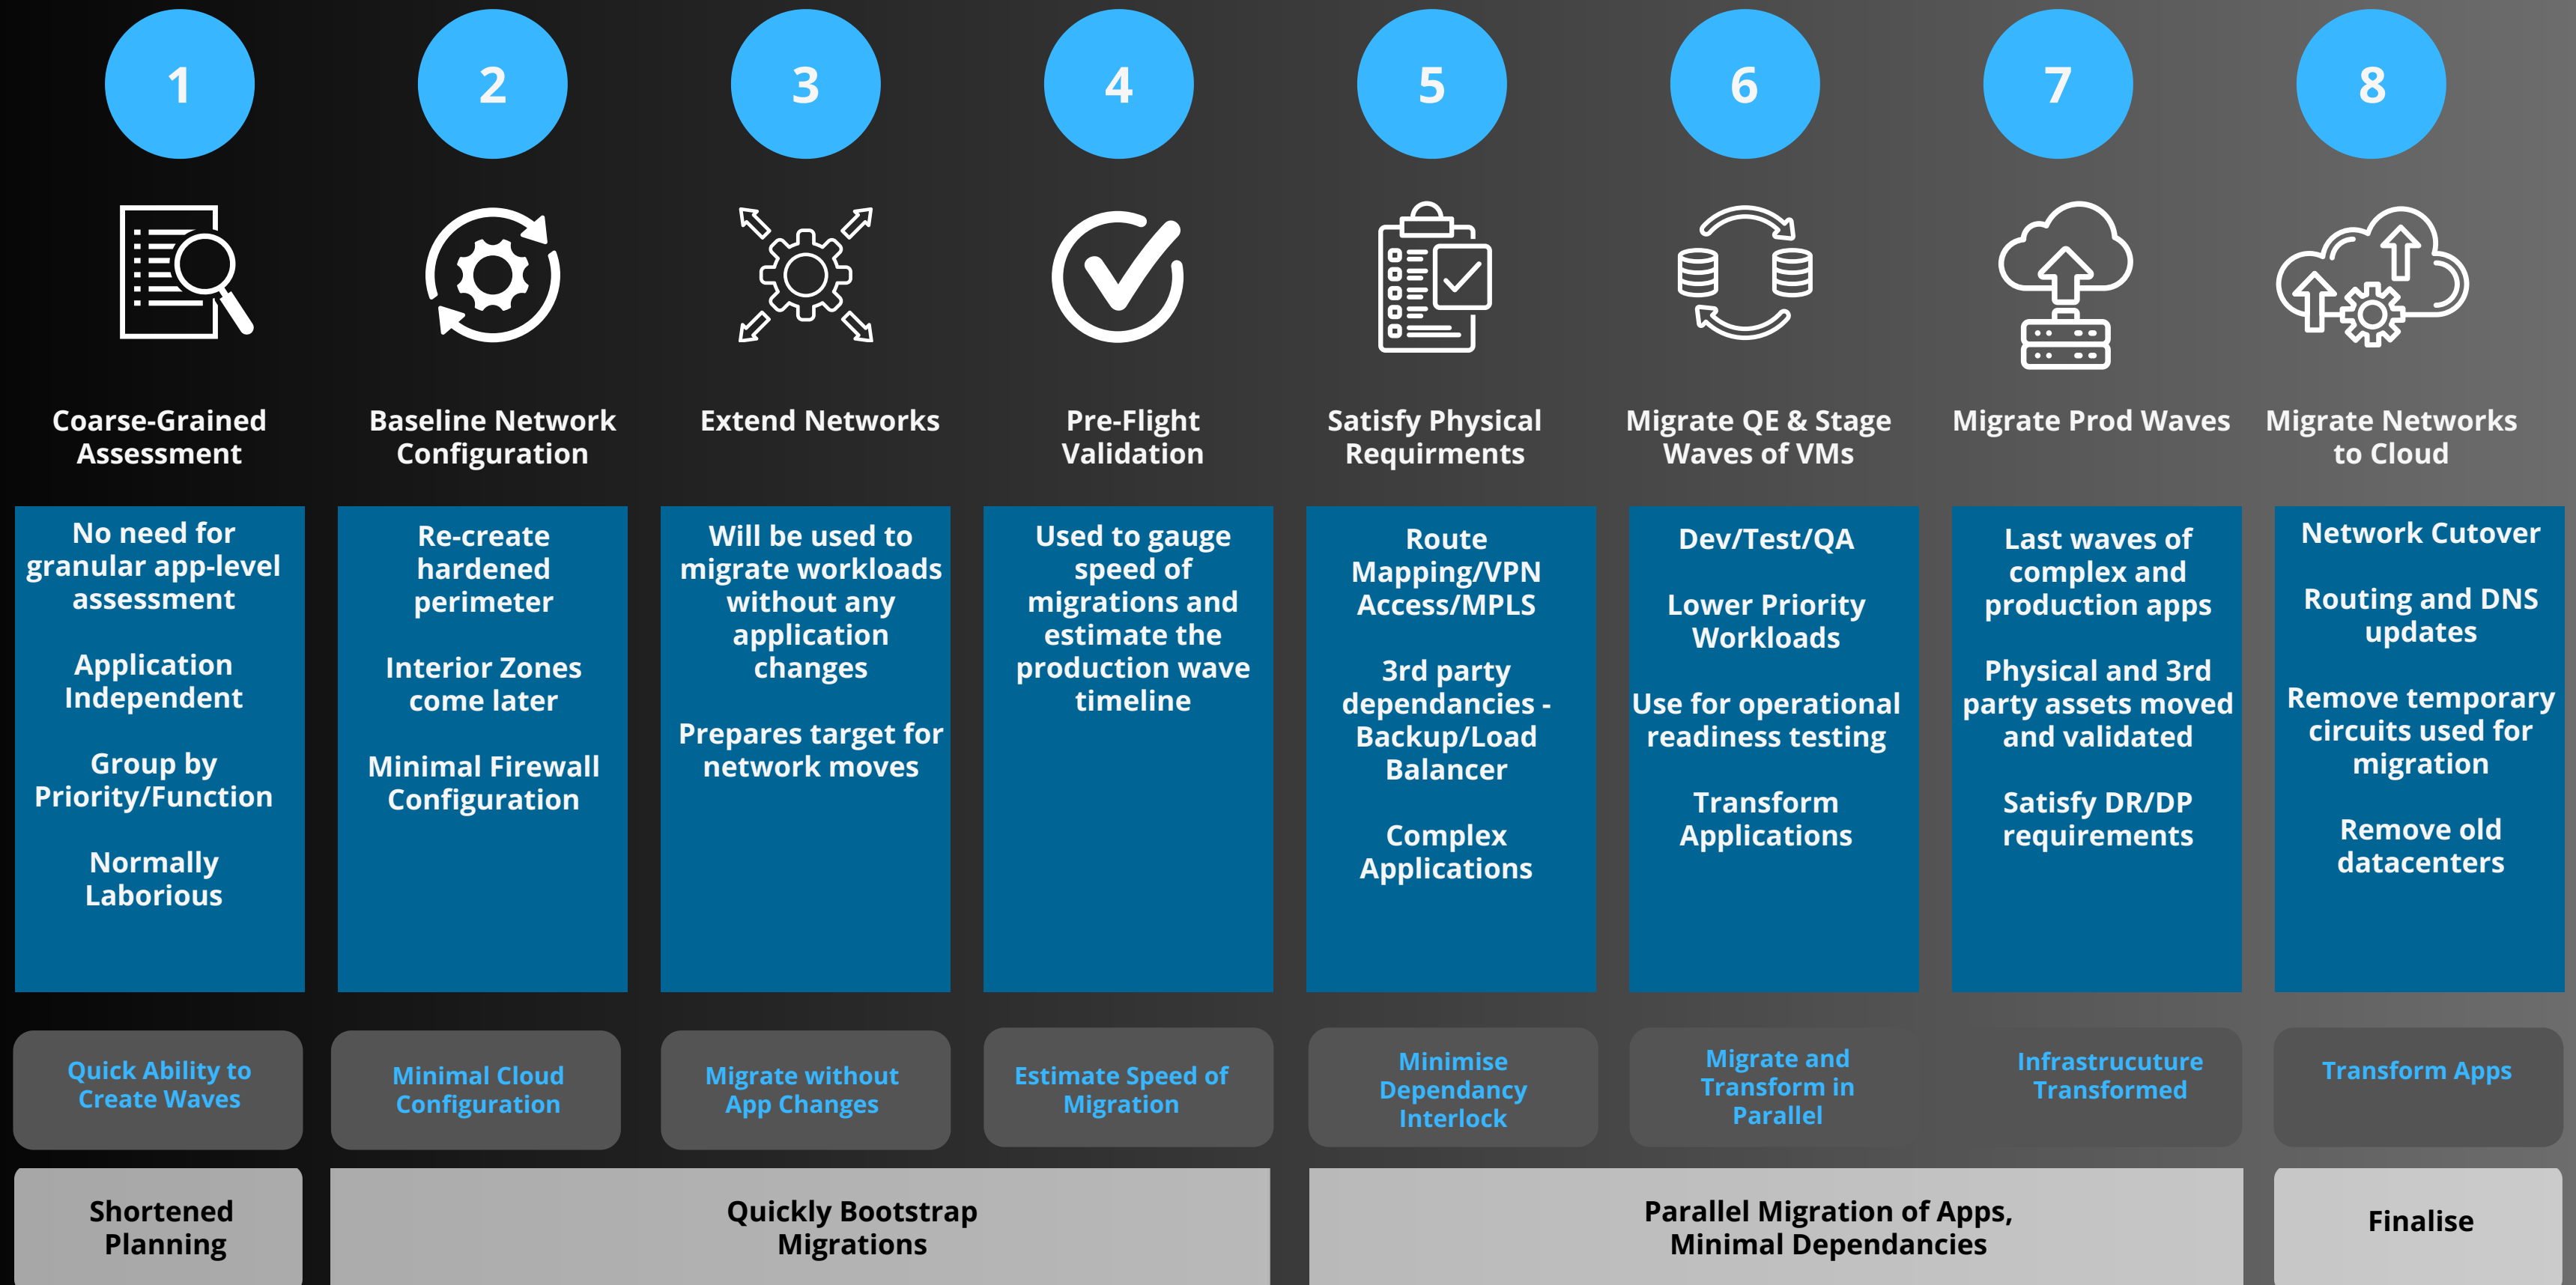

€2000 for 100VMs Assessed - €5 per additional VM

Sample Outputs

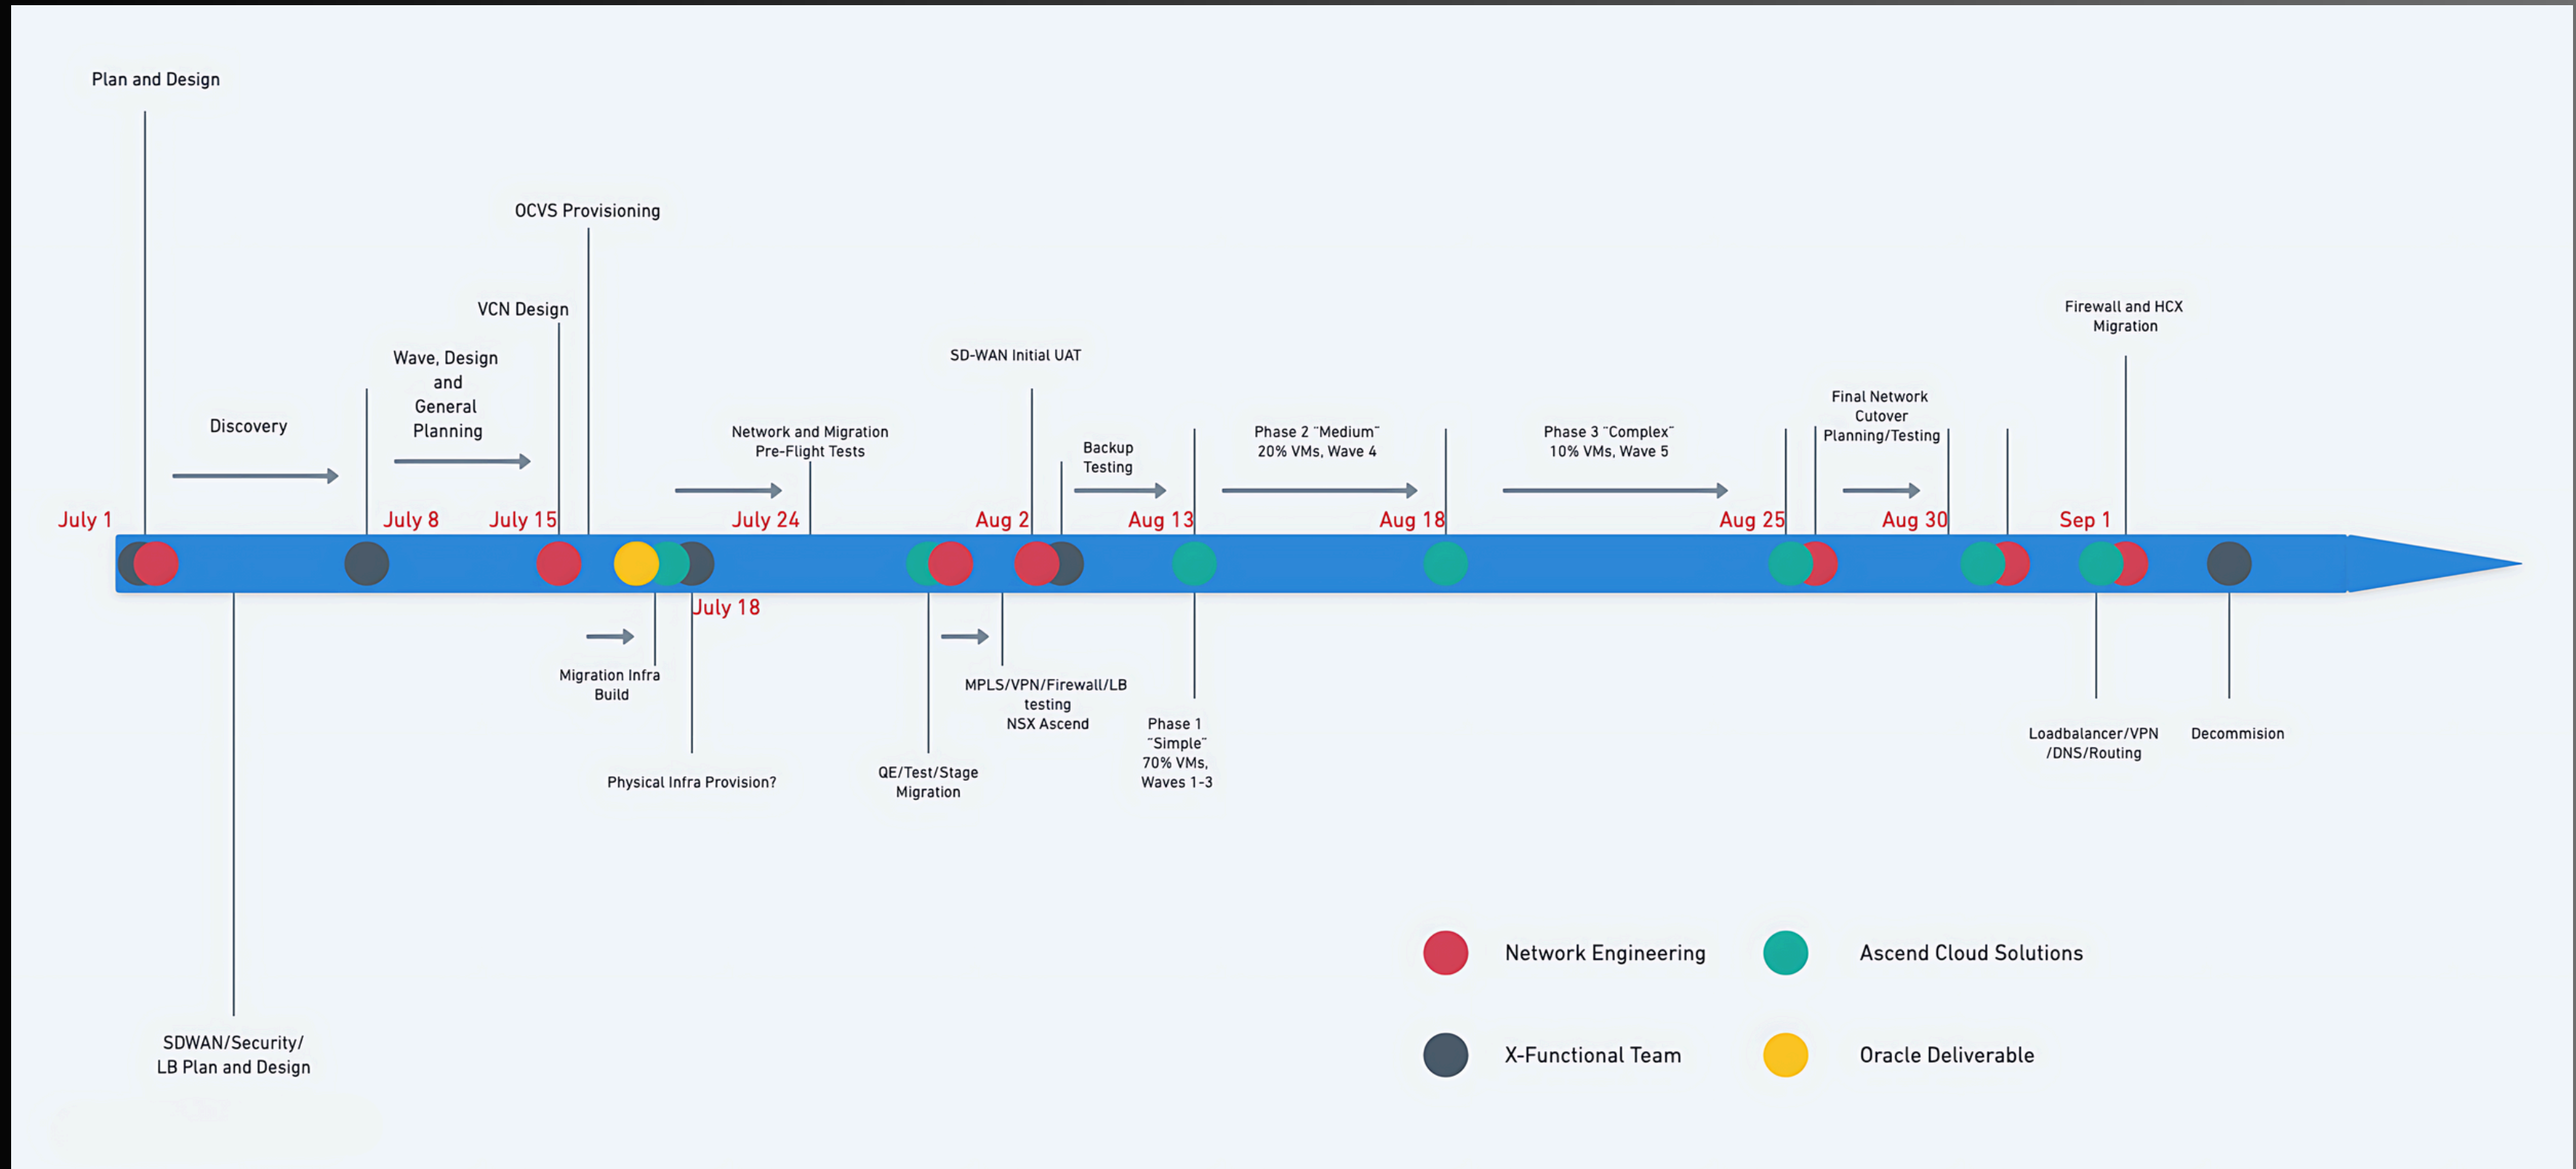

Profile	Phase	Host No.	CPU Cores	Total Mem (GB)	Server Specs	Server/DC/ License Per Month	Total (36M)
As-is	Original Footprint	11	352	8444	BM.Standard3: Processor: Intel Xeon Platinum 8358, 48C with 1TB Ram	€32,676.97	€1,176,370.92
	Matched Cloud	8	384	8192			
Consolidated Optimistic	Original Footprint		118	1701	BM.Standard2: Dual Processor: Intel Xeon Platinum 8167M, 26C with 768GB Ram	€11,116.99	€400,211.64
	Matched Cloud	4	114	2304			
Consolidated Conservative	Original Footprint		163	4342	BM.Standard3: Dual Processor: Intel Xeon Platinum 8358, 26C with 1TB Ram	€16,828.00	€605,808.00
	Matched Cloud	4	192	4096			

Ascend Cloud: Low Cost Expedited/Parallel Migration Process
