ABOUT US

At Vire Control Systems, LLC. our systems are designed and engineered with quality and excellence in mind.

From conceptual design, to detailed drawings, to finished product, we can provide solutions for the smallest to the largest industrial manufacturing process. There is no project to big or too small.

Our systems provide improved efficiency, safety and increased productivity. Your success is our success.

"Our mission is to provide innovative solutions that exceed our client's expectations."

-John Vire
Owner

OUR CUSTOMERS SAY:

"The team at Vire Control Systems, provide the highest level of engineering design, assembly, programming and customer service."

-David Howe
COO of Consumed Group, Inc.

"Vire Control Systems, has provided control systems integration for us on numerous projects. They have always met our programming expectations and have always been willing to share their knowledge and ensure our team was properly trained on the operatoon of the systems."

-Rick W. Smith
Plant Engineer/Bridgestone Americas Tube Business
