THE SALE OFFERING

Industry outlook

Despite the Australian national sheep flock declining by 7.4%, or approximately 5.9 million head as of June 2025, due to a combination of dry seasonal conditions and strong mutton prices, we at Barwon — as we hope many producers here today — remain positive about the future of the sheep industry. Record high lamb and mutton prices, forecast to continue strengthening, underpin this confidence. The National Trade Lamb Indicator, which averaged 830 c/kg cwt in 2024–25, is forecast to rise to 1085 c/kg cwt in 2025–26. Rising export demand and continued improvements across the supply chain further support a strong outlook. It is an exciting time to be a commercial lamb producer.

The rams

The line-up of rams presented for you today features exclusively 2025 autumn drop rams. Despite a testing preparation period these rams have really come into their own over recent months, presenting in the condition you see today.

We would not be offering these rams for sale unless we were completely confident in their ability to perform and go straight to work.

Breeding philosophy

At Barwon, our breeding philosophy is built on a balance of physical assessment and genetic data (ASBVs). It is often said that you must choose between breeding on type or breeding on figures, we respectfully disagree. Our aim is to breed rams that both look the part and are supported by sound, reliable genetic data.

We breed traditionally presenting rams with outstanding physical attributes, including soft heads, sound structure, excellent feet, strong muscle development, and even fat cover. Beyond phenotype, these rams are backed by strong ASBVs, with a particular emphasis on growth traits, which drive faster-maturing progeny, a key priority for commercial lamb producers using terminal sires.

Management & preparation

These rams are block joined and weaned at 2 months of age. All rams offered for sale have been genomically tested, ensuring confidence in both pedigree integrity and genetic performance. Wherever possible, rams are run on pasture-based systems.

Due to recent seasonal conditions, rams have received supplementary lupins and hay to maintain steady growth. They have progressed exceptionally well and are presented in natural working order. We do not over-feed or artificially prepare rams for sale day, what you see today is exactly what you get. Only rams we are proud to stand behind are offered.

All rams have had their animal health treatments, including vaccination with Gudair for OJD, drenched with sidewinder and have been vaccinated with Eryvac 7 in 1.

BUYERS PLEASE NOTE: Once rams have arrived at the farm post-sale, Barwon will take responsibility for any deaths that occur within 28 days (doesn't cover injury). Buyer to provide a photograph as evidence as well as the ram tag number. Full replacement or money back, whatever we agree on. After this point the management of the rams is under total control of the purchaser.

The minimum price for a ram to be individually registered as a stud ram will be \$3000.

Outside agents to receive 5% commission on any ram purchased must be physically present at sale.

ASBV DESCRIPTIONS

BWT	<i>Birth weight</i>
WWT	<i>Weaning weight</i>
PWT	<i>Post-weaning weight</i>
PFAT	<i>Post-weaning fat depth</i>
PEMD	<i>Post-weaning eye muscle depth</i>
TCP	<i>Terminal carcase production index</i>

ASBV PERCENTILES

Terminal percentiles dated 15/01/2026: use the following table to work out where an individual sits relative to the 2024 drop cohort.
