THE SALE OFFERING

At Barwon Studs, we have been selecting for early growth (weaning weight/WWT) in preference to later growth stages (post-weaning weight/PWT). This results in earlier-maturing animals that achieve target weights quicker. The wider industry is moving more in this direction.

This year's sale features rams from both the Autumn and Spring 2024 drops. We're extremely pleased with the quality of this draft. Each ram has been carefully selected for key physical traits: sound structure, strong muscle development, even fat cover, excellent feet, and classic, true-to-type heads.

Beyond their physical appeal, these rams are backed by solid ASBVs with a strong focus on growth. They offer a well-rounded balance between phenotype and genotype. They have not been fed grain for the past three months, running entirely on pasture to ensure they are presented in natural working condition, not overfed or carrying excess fat. They're ready to go straight out with your ewes and get to work immediately.

You will notice that 41 rams are listed without ASBVs. This was the result of an issue with DNA sample collection. ASBVs for these 41 rams will be available in a supplementary sheet on sale day. Please note that these ASBVs will be calculated without confirmed pedigree and genomic information. As a result, some values will appear lower than the rams' actual performance and should not be considered their 'true' ASBVs. If you purchase one of these 41 rams and would like to confirm its 'true' ASBVs, just let us know and we'll arrange DNA sampling to provide the verified figures. Please note this issue **ONLY** affects those 41 rams.

All rams have had their animal health treatments, including vaccination with Gudair for OJD, drenched with Zolvix and have been vaccinated with Coopers 8 in 1.

BUYERS PLEASE NOTE: Once rams have arrived at the farm post-sale, Barwon will take responsibility for any deaths that occur within 28 days (doesn't cover injury). Buyer to provide a photograph as evidence as well as the ram tag number. Full replacement or money back, whatever we agree on. After this point the management of the rams is under total control of the purchaser.

The minimum price for a ram to be individually registered as a stud ram will be \$3000.

ASBV PERCENTILES

Terminal percentiles dated 1/09/2025: use the following table to work out where an individual sits relative to the 2024 drop cohort.

	BWT	WWT	PWT	PFAT	PEMD	TCP
