About Us

The American Psychological Association (APA) is committed to reporting all psychology-related news that matters to our readership and society. Our reporters and editors cover the latest in important psychological research advances, how psychological science impacts societal issues, business and policy trends, career advancement, psychology practice guidance, and more. We are the world's most comprehensive and authoritative source of news on psychology for psychologists. *Monitor on Psychology* subscribers, made up almost entirely of APA members, get the print magazine delivered to their mailboxes and/or the digital magazine to their inboxes eight (8) times per year.

I certify that the information in this Publisher's Statement is correct.
