BASKET STRAINER

A single WARCO Basket Strainer is shown in the center of the header. It has a white body with a black top and bottom flange, and a bright orange handle on top.

WARCO Basket Strainers protect equipment from liquids containing debris and process system upsets. Warco basket strainers have more holding capacity than other brands to minimize pressure loss.

Features:

- Polypropylene construction
- All non metallic

Applications:

- Chemical Processing
- Water Treatment
- Electro Plating
- Metal Treatment
- Printed Circuits are exposed to extreme temperatures
