

Franchetti participates in the “German Spring Conference” on May 12, in Frankfurt

Arzignano (VI), May 5, 2025 – **Franchetti S.p.A.** (“Franchetti” or the “Company” or the “Group”, Ticker BIT: FCH), the parent of the multinational software development and engineering design Group focused on solutions for the safety and predictive planning of maintenance activities on infrastructure network structures, announces its participation in the “**German Spring Conference**,” an investor conference organized by Equity Forum, which will take place from May 12 to 14, 2025, at the Flemings Selection Hotel Frankfurt City, Eschenheimer Tor 2, Frankfurt.

On May 12, 2025, Paolo Franchetti, Chairman and CEO of Franchetti, will meet with international investors to present the financial results as December 31, 2024 and the latest corporate news.

The presentations will be made available on the website www.franchetti.tech, "Investor Relations/Presentations" section.

Franchetti S.p.A.

Franchetti S.p.A. heads the Franchetti Group, a pioneer in the management, diagnostics and predictive maintenance of infrastructure (bridges and viaducts in particular). Founded in 2013 in Arzignano (VI), with subsidiaries in Brazil and Canada and operations in the US and India, Franchetti is an innovative SME that has worked on over 40,000 equivalent motorway and railway bridges worldwide. The Group boasts a technical and scientific track record that places it among the industry's leading international experts. Operations are broken into two main business lines: diagnosis and planning for infrastructure maintenance, with inspections and assessments, intervention planning and construction management and ICT services for the predictive programming of infrastructure maintenance. Franchetti has in fact developed two proprietary software programs that leverage the potential of artificial intelligence and predictive data analysis: Argan® can estimate an infrastructure's life cycle and automatically assess safety levels over time for a range of maintenance scenarios and contexts, Pathwork® ensures the optimized management of road and highway works on infrastructure and to support sustainable mobility, while SIDECHECK® can intelligently compare collected data related to inspections, inspectors, schedules, and work estimates to make the evaluation process as objective and complete as possible. With a workforce of over 100 professionals, more than 90% of whom are engineering graduates, the Group achieved a Value of Production of Euro 9.0 million at the end of 2024 (+28% on FY23) and an EBITDA of Euro 3.4 million (+34% on FY24).
