PRESS RELEASE

Franchetti S.p.A. announces its participation in the *"42nd Münchner Kapitalmarkt Konferenz" in Munich*

Arzignano (VI), November 10, 2026 - **Franchetti S.p.A.** (**Ticker BIT: FCH**), a multinational company specializing in advanced diagnostics, digital monitoring and predictive maintenance solutions for infrastructure, announces that it will participate on November 11, 2026 in the ***"42nd Münchner Kapitalmarkt Konferenz"***, to be held on November 11 and 12, 2026, an event organized by GBC AG at The Charles Hotel in Munich.

Franchetti's top management, represented by **Paolo Franchetti,** *Chairman and Chief Executive Officer* and **Jacopo Nembro,** *Head of Finance*, will take the opportunity to present the company's recent financial results and future strategies to international institutional investors.

The presentation will be made available on the website www.franchetti.tech, in the "Investor Relations/Presentations" section.

This press release is available at https://www.franchetti.tech/news.

Franchetti S.p.A.
Franchetti is an international group specializing in advanced diagnostics, engineering and predictive management of infrastructure. Founded in 2013 in Arzignano (VI), the Group combines specialist engineering expertise with proprietary technologies to help infrastructure concessionaires, operators and owners understand, assess and manage their assets over time. Its activities include inspection and diagnostics, structural assessment, design of remedial works, digitalization and BIM, as well as technology solutions for predictive maintenance planning. Franchetti operates internationally across the main transport infrastructure sectors and has gained experience on more than 50,000 equivalent motorway and railway bridges. In this field, Franchetti has developed "kTema", a proprietary suite that integrates advanced technologies, artificial intelligence and data analytics to support the management of the entire infrastructure lifecycle. The platform makes it possible to organize and interpret data from inspection activities, support the assessment of structural condition, plan interventions, and optimize maintenance and worksite activities.
