WHO ARE WE?

Established in 1983, by ex – navy Lieutenant Captain Essam Shaaban, **ETMS** is one of the first private maritime companies in Egypt. Earlier branched in the Netherlands , and currently having an affiliate in Turkey, ETMS integrates diverse markets , efficiently overcoming cultural differences and communication barriers , thus eliminating major shipping and operational obstacles. We started as a ship agency at all Egyptian ports and Suez Canal, representing and serving owners of reefer, livestock, bulk, general cargo, and heavy-lift vessels. .

In 1987, the company became very active in time-chartering as well as booking vessel spaces for special projects; IMO, bulk,and reefer cargo, serving mainly the North Continent – Med trade.During this period, the agency department has vastly grown to be offering a wide range of services including cargo / operations survey, stevedoring, storage, and cargo handling at all local ports,specializing in heavy projects and dangerous goods. With a view to expanding further, a sophisticated logistics department has been integrated into our activities chain to deliver cost-effective customs clearance and land transportation services.

And more is yet to come...

CHARTERING

Chartering Gallery

- **Established** in the Netherlands in 1987, our Chartering Department has since arranged cargo bookings for general cargo, projects, heavy lifts, dangerous goods, and bulk cargoes.

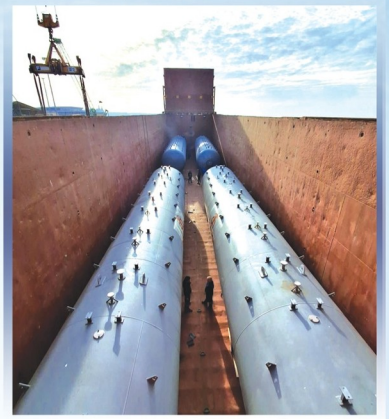

- **Operating** from Egypt, we work closely with many of the country's reputable charterers, freight forwarders, shippers, and receivers. To safeguard our clients' privacy, we generally keep cargo orders off the open market and work directly with trusted MPP shipowners, whom we often represent in Egypt as general or preferred agents. This approach allows us to deliver quality service at competitive rates. Our cargo orders are firm and stemmable, and our sailings operate on schedule.
