If you come across an unattended wildfire, it is important to take immediate action to ensure your safety.

Information on reporting a wildfire

If you come across an unattended wildfire, it is important to take immediate action to ensure your safety. To report a fire:

Call 911 or the [Department of Natural Resources and Energy Development](#)

The quicker you report the situation, the faster the authorities can respond and take appropriate measures.

Provide essential information

When making the report, provide these crucial details:

- **Name:** Clearly state your name for identification purposes.
- **Telephone number:** Provide a reliable contact number for updates.
- **Exact location:** Describe the wildfire's location with landmarks and nearby roads.

- **Burning materials:** Describe what is burning (vegetation, trees, etc.).
- **Size of fire:** Estimate the fire's size or provide reference points for scale.
- **Firefighting efforts:** Report if anyone is actively fighting the fire.
- **Access to fire:** Describe accessibility, including road conditions or obstacles.

Stay a safe distance from the wildfire and do not attempt to fight it on your own unless you have been trained and equipped to do so. Prioritize your personal safety and leave firefighting to the professionals.
