

STATEMENT OF QUALIFICATION

WORLDWIDE TURNKEY FOUNTAIN SYSTEMS | ENGINEERING COORDINATION | INSTALLATION & COMMISSIONING

COMPANY OVERVIEW

Laughing Waters, Inc. is a turnkey water feature contractor specializing in complex, public-facing fountain systems where engineering precision, constructibility, and long-term reliability are critical.

With more than two decades of experience, Laughing Waters delivers integrated fountain solutions for municipalities, civic institutions, commercial developments, and cultural destinations throughout the United States.

Our work spans interactive fountains, architectural fountains, memorials, reflecting pools, and large-scale civic water features.

Laughing Waters operates at the intersection of design coordination, engineering integration, equipment supply, and field execution.

We routinely work alongside architects, landscape architects, engineers, and general contractors to transform conceptual designs into durable, code-compliant, and operationally sound fountain systems.

Our approach is execution-driven. We focus on constructibility, public safety, system longevity, and risk mitigation — ensuring that each fountain performs reliably from day one and remains serviceable for years to come.

WORLDWIDE CONTRACTORS FOR
TURNKEY FOUNTAIN SYSTEMS, ENGINEERING COORDINATION,
INSTALLATION & COMMISSIONING

Laughing Waters is most effective on projects where the fountain system is critical to the success of the space — not decorative afterthoughts.

WHO WE ARE BEST SUITED FOR

Laughing Waters is best suited for projects where clarity, accountability, and technical competence are essential.

We regularly partner with:

- **General Contractors**

Teams seeking a single-point fountain partner capable of managing submittals, coordination, installation, startup, and owner turnover.

- **Commercial & Mixed-Use Developers**

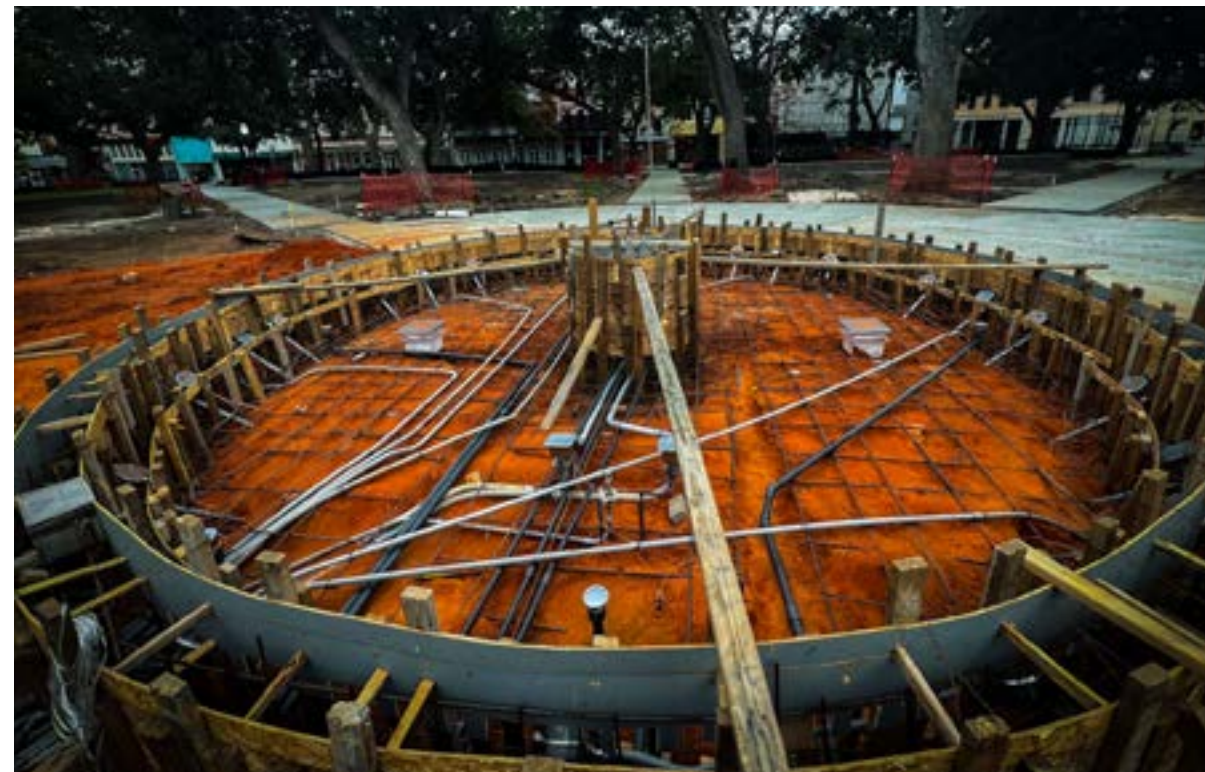

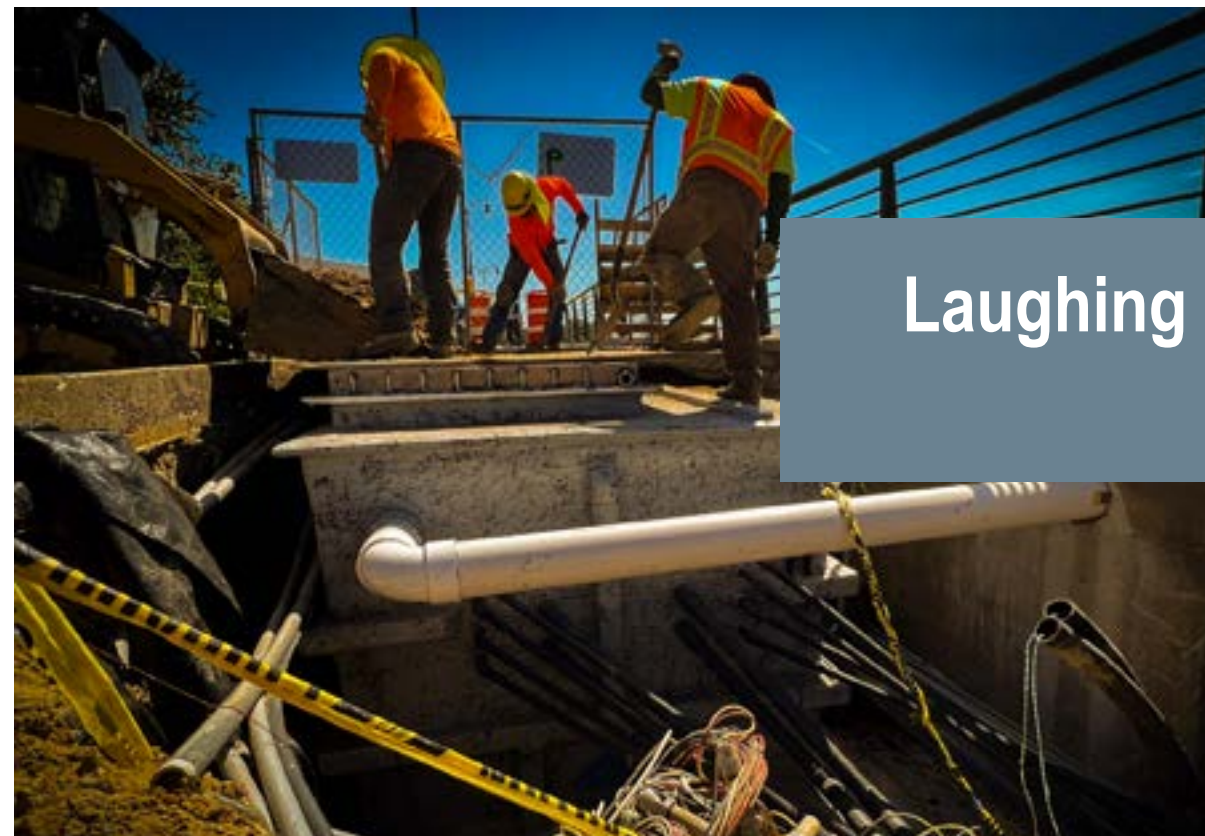

Projects with highly visible water features integrated into complex urban environments.

- **Municipalities & Park Districts**

Public fountains, interactive splash features, memorials, and civic plazas requiring strict safety compliance and long-term reliability.

- **Civic & Cultural Institutions**

Museums, memorials, campuses, and public gathering spaces where fountains serve as architectural centerpieces.

CORE SERVICES

Laughing Waters provides comprehensive fountain services through a coordinated, turnkey delivery model.

Design Assist & Technical Coordination

We support design teams through early-stage technical input, constructibility reviews, and system coordination. Our role is to ensure that fountain designs are achievable, serviceable, and aligned with project budgets and schedules.

Fountain Engineering & Systems Integration

Laughing Waters integrates mechanical, plumbing, electrical, and control systems into fully coordinated fountain assemblies. Our experience includes pump selection, filtration systems, treatment systems, piping layouts, vault coordination, and control logic integration.

Equipment Supply & Fabrication

We supply complete fountain equipment packages, including pumps, filtration, treatment systems, control panels, lighting, nozzles, and custom-fabricated components. Equipment is coordinated for compatibility, durability, and long-term maintenance.

Installation & Commissioning

Our installation teams execute complex fountain installations with a focus on precision, sequencing, and quality control. We coordinate closely with general contractors and trades to ensure smooth integration into broader construction scopes.

Training, Turnover & Long-Term Support

Laughing Waters provides system startup, testing, owner training, documentation, and turnover support to ensure smooth handoff and ongoing operational success.

TECHNICAL CAPABILITIES

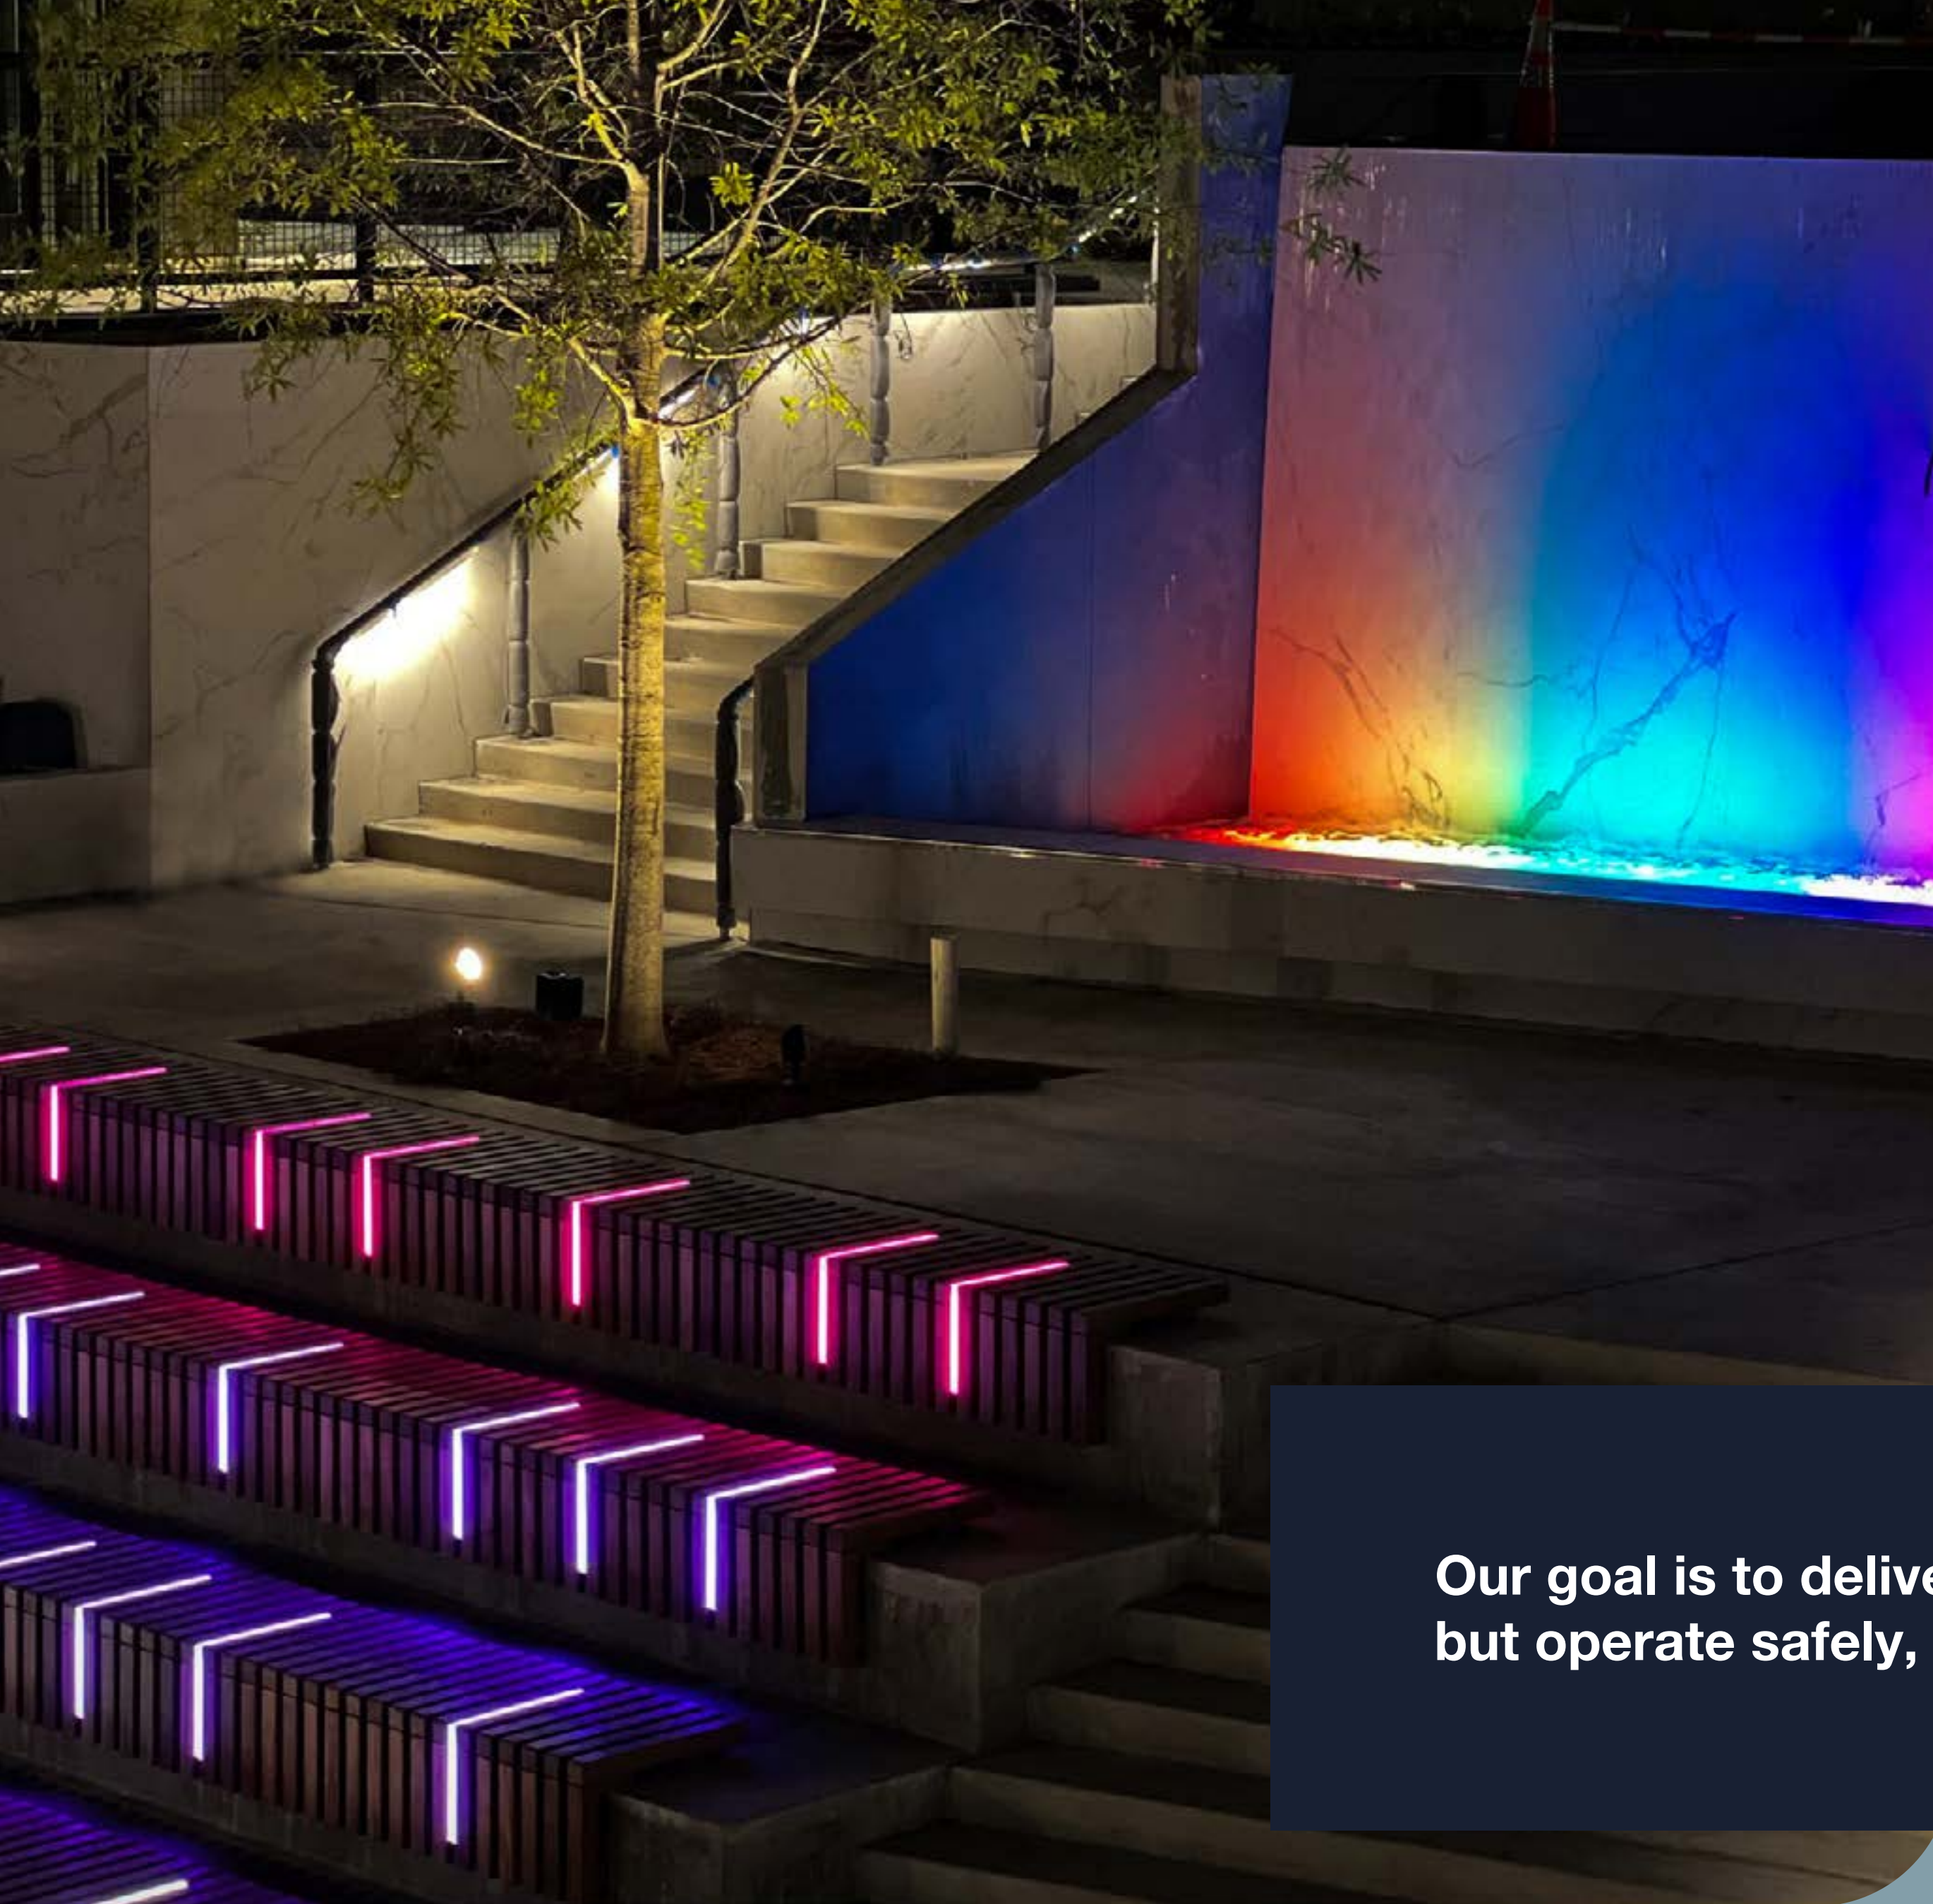

Laughing Waters specializes in technically demanding fountain systems that require careful integration and strict adherence to codes and standards.

Our technical capabilities include:

- Interactive fountain systems meeting state and national safety codes
- Fail-safe control systems with real-time monitoring
- High-turnover filtration and water treatment systems
- UV sterilization and chemical treatment integration
- Complex underground vaults and piping networks
- Electrical coordination and programmable control systems
- RGBW lighting and laminar flow features
- Cold-climate system design considerations

Our team approaches each project with a systems mindset — ensuring that all components work together reliably under real-world operating conditions.

RISK MANAGEMENT & RELIABILITY

Public water features demand a high level of responsibility. Laughing Waters places risk management and reliability at the center of every project.

Key priorities include:

- Strict adherence to applicable codes and regulations
- Redundant safety controls and automated shutdown protocols
- Thorough startup and commissioning procedures
- Comprehensive owner training and documentation
- Long-term serviceability and access planning

Our goal is to deliver fountain systems that not only meet design intent, but operate safely, predictably, and efficiently throughout their lifespan.

LEADERSHIP & TEAM

Laughing Waters is led by experienced professionals with deep knowledge of fountain construction and execution.

Founder & President

With more than 20 years in the fountain industry, the company's leadership brings hands-on experience across design coordination, engineering integration, installation, and project delivery.

This experience ensures accountability, continuity, and informed decision-making on every project.

Our extended team includes skilled project managers, technicians, and installation professionals supported by long-standing industry partners and suppliers.

Harbor Steps Fountain

Location: Seattle, Washington
 GC: Avara Construction
 Architect: GGLO Design
 Scope: Fountain Equipment Installation
 Contract Price: \$1.5M

Harmony Square Fountain

Location: Tinley Park, IL
 GC: Wegman Construction
 Architect: Lakoda Group
 Scope: Interactive Water Feature Installation
 Contract price: \$1M

High Street Fountain

Location: Atlanta, Georgia
 Architect: Dwell Design Studio
 GC: Brasfield & Gorrie
 Scope: Fountain equipment room supply and installation
 Contract Price: \$500K

St. Martins Church Fountain

Location: Houston, Texas
 Architect: Jackson & Ryan Architects
 GC: Tellepsen Construction
 Scope: Install several water features throughout campus
 Contract Price: \$700K

City Hall Park

Location: Burlington, Vermont
 GC: S. D. Ireland Brothers
 Architect: Wagner Hodgson Landscape Architecture
 Scope: Interactive water feature installation
 Contract price: \$1M

Argenta Plaza

Location: Little Rock, Arkansas
 GC: Alessi Keyes Construction
 Architect: Taggart Architects
 Scope: Fountain equipment room supply and installation
 Contract Price: \$1.2M

GEOGRAPHIC REACH

Laughing Waters operates worldwide throughout the United States and Europe, delivering fountain systems across a wide range of climates, jurisdictions, and regulatory environments.

The company is also expanding its international presence through strategic European operations, supporting select projects with the same technical rigor and execution standards.
