

Hyland IDP for Higher Education

AI-powered document capture, separation, classification and intelligent data extraction and enrichment

With continued growth of student records, applications and forms, colleges and universities require the ability to efficiently and reliably process incoming documents. Without advanced data extraction capabilities, document capture can become a bottleneck for automation.

Hyland IDP leverages AI agents powered by large language models (LLMs) to provide document recognition, separation, classification, data extraction and enrichment to reliably improve efficiency, accuracy and the speed of document processing.

How it works

Agentic document processing

Hyland IDP uses LLMs with generative AI (gen AI) to power the recognition, separation, classification and extraction of data.

User experience

With a gen AI prompt-based interface, intelligent suggestions and low-code configuration and integration, Hyland IDP is easy to set up and use.

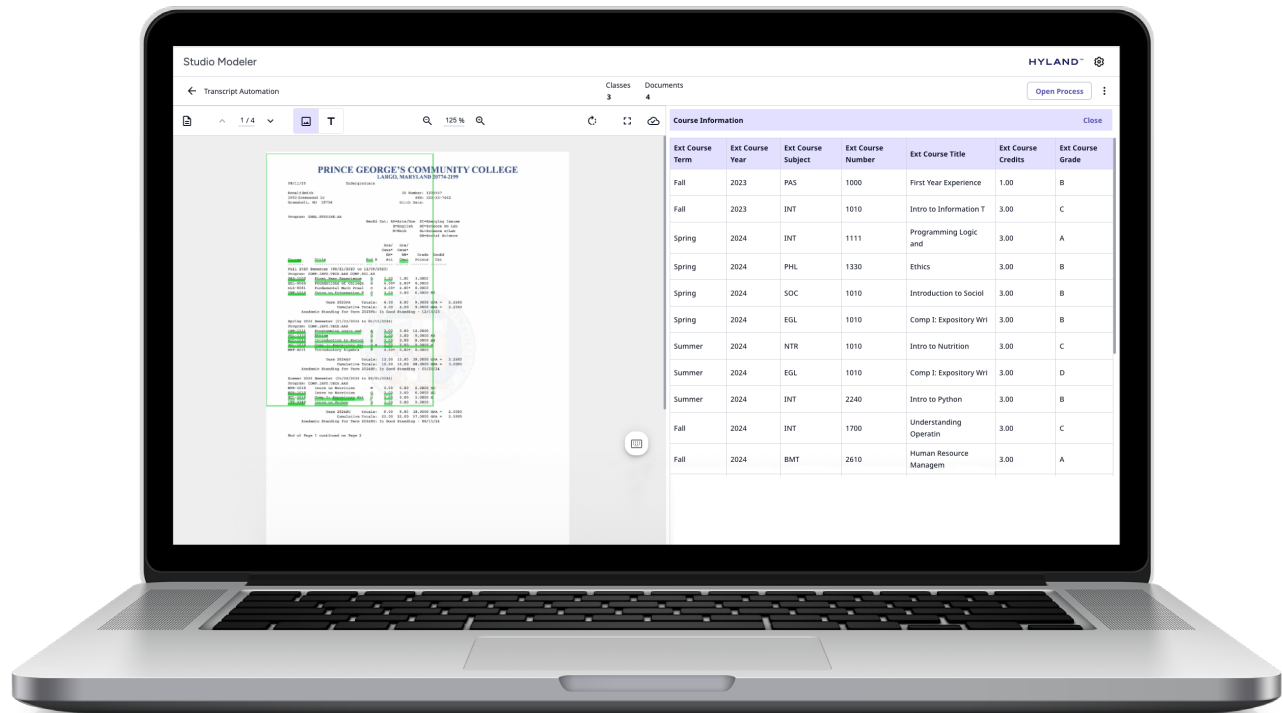

Document AI

As part of Hyland Content Innovation Cloud™, Hyland IDP provides access to advanced content intelligence and enrichment to enhance business processes.

Benefits

- **Reduce costs:** AI-powered document recognition, separation and classification eliminate the need for costly manual processing.
- **Speed up business processes:** AI-powered prompt-based interface accelerates solution building.
- **Improve data accuracy:** Intelligent data extraction and validation reduce data errors and the associated risks. Extracted data is automatically entered into your business systems, eliminating data entry errors.
- **Improve security and compliance:** Reduce the risk of exposure by automating the processing of sensitive and private information.
- **Reduce paper usage:** Digital document processing saves paper, reduces storage costs and contributes to environmental sustainability.
- **Improve student and employee experiences:** Intelligent automation reduces employee burnout and churn caused by redundant, high-volume document processing. Having critical data available faster improves student and employee experiences.
- **Simplify automation building:** Intuitive, low-code automation platform reduces requirements for IT resources.
- **Leverage the power of AI:** With Hyland IDP and the Content Innovation Cloud, you'll get access to advanced content intelligence and enrichment to enhance business processes.

About Hyland

Hyland empowers organizations with unified content, process and application intelligence solutions, unlocking profound insights that fuel innovations. Trusted by thousands of organizations worldwide, including many of the Fortune 100, Hyland's solutions fundamentally redefine how teams operate and engage with those they serve. For additional information on the Hyland platform and services, please visit [Hyland.com](#).
