

Who We Are

Heal. Grow. Thrive.

We are here to help every step of the way.

We are an integrated behavioral health center which includes a psychiatric care team along with our medical care team. We provide services for all ages and coordinate medical and behavioral health care among our providers. We work as partners with our patients to determine treatment plans and bridge gaps for services needed. We are committed to continually evaluating our community's needs and evolving to meet those needs.

MISSION

To save lives, improve health, and build community.

VISION

People serving the community, getting results, here for the future.

VALUES

Integrity – Compassion – Excellence

MEMORIAL HOSPITAL
FAMILY MEDICAL CENTER
BEHAVIORAL HEALTH

Nurse Practitioner

MELISSA HATHORN, PMHNP

The Psychiatric Mental Health Nurse Practitioner can evaluate your symptoms and work with you on a course of care. This may involve an initial visit to discuss symptoms and tests or evaluations to determine the proper steps to help diagnose root causes. Your PMHNP can then discuss with you an appropriate treatment plan and oversee your progress.

Behavioral Health Consultant (BHC)

STEPHANIE GALLEGOS, LCSW, BHC

The BHC works with all the medical providers in conjunction with patients to address and improve behavioral issues. This can include creating treatment plans to reduce negative behaviors to promote positive choices and health patterns.

Counseling

ALI CAPURRO, LCPC, BHC

The Licensed Professional Counselor (LPC) works with individuals, couples, and families to move through behavioral and emotional difficulties. At Family Medical Center, the LPC offers comprehensive care by collaborating with the patient's medical and psychiatric team as needed.

Behavioral Health Coordinator (BHCC)

MACKENZIE PFEIFER, BHCC, BSW

The psychiatric team's BHCC assists with care coordination. Their goal is to streamline your overall care between providers and help close gaps in care. The BHCC can also help bridge services between the community, the clinic, and you.

YOUR CARE TEAM CAN HELP YOU

We provide a full spectrum of psychiatric services to patients with varying diagnoses, including but not limited to:

- **Medication Management (for those over 10 years old)**
- **Brief Interventions**
- **Consultations**
- **Care Coordination**
- **Connections to External Resources**

Family Medical Center does not currently offer dedicated substance abuse treatment, so we may refer you to outside resources that specialize in this kind of treatment.
