MY MONEY GROWS | BUDGETING LESSON 2

Where Did the Money Go? | Grades 9–12 | 55 minutes

Purpose: Introduce students to bank statements and the 10-10-80 budgeting framework.

Objective: Students interpret deposits, withdrawals, and balances; analyze real-world-style spending; account for a pending transaction; and recommend a realistic budget that includes saving.

Teacher lesson outline — 55 minutes

Time	Activity	Student action
0–7	Video + notes	Watch PTAT's recorded 10-10-80 video; complete guided notes.
7–12	10-10-80 Money Challenge	Calculate sample allocations and identify a tradeoff.
12–19	Read the Money Trail	Identify opening balance, credits, debits, ending balance, and pending transactions.
19–34	Bank Statement Detectives	Groups investigate one character's case and record evidence.
34–44	Budget Makeover + Alert	Recommend adjustments; reconcile a new pending expense.
44–51	Case Closed!	Each group delivers a brief evidence-based recommendation.
51–55	My Money Check	Individual exit ticket and take-home budget commitment.

Teacher setup

Play the existing Planned to A.T. budgeting video (allow up to 7 minutes). Print the note-taking guide, one case narrative and matching statement per group, an Investigation Report per student, and the exit ticket. Provide calculators and highlighters. For a 55-minute class, use Stuart, Tatiana, and Ayden; Katie is an optional advanced fourth case.

Educational standards addressed

SS.912.FL.3.9: Develop a budget based on a given income and expenses for long-term and short-term financial goals.

START: Essential Questions

Use these questions to introduce the lesson and guide the discussion.

01

How do I read a bank statement?

ANSWER / FACILITATOR PROMPT

Point out beginning and ending balance, transactions, credits, debits and how they affect the balance.

02

How do I create my own budget?

ANSWER / FACILITATOR PROMPT

Using the provided guide, students can walk through creating their own budgets.

Ask students to demonstrate:

Find a deposit and a withdrawal on a case statement; explain how each changes the balance. Then name one expense they would plan for in a personal budget.

© 2026 Planned to A.T., Inc. | My Money Grows

TEACHER / FACILITATOR GUIDE

0–7 | Watch and Notice

Play the existing PTAT 10-10-80 video. Ask students to fill in the provided note guide. Briefly confirm what each 10%, 10%, and 80% category means as stated in your video; do not assign labels until confirmed by the recording.

7–12 | Calculate and Choose

Use $2,900 monthly take-home pay. Students calculate 10% = $290, second 10% = $290, and 80% = $2,320. Ask: What if a required expense exceeds the amount available? Explain that percentages are a planning starting point, not a universal rule.

12–19 | Read the Money Trail

Project a sample statement. Point to opening balance, date, deposits/credits, withdrawals/debits, running balance, and ending balance. Demonstrate: prior balance + money in − money out = new balance. Explain posted vs. pending transactions.

19–34 | Financial Investigation

Assign groups of 3–4 one case and statement. Roles: transaction detective (find evidence), numbers investigator (calculate), risk spotter (identify warning signs), financial coach (recommend changes). All students fill out the report.

34–44 | Budget Makeover

Groups choose two realistic spending changes and a savings amount, then respond to the surprise pending transaction. Require numerical evidence. A low ending balance is not proof of an overdraft fee.

44–51 | Case Closed!

Give each group 60–90 seconds: identify the case, present two transactions, explain the biggest risk, and recommend two actions. Other students ask one question.

51–55 | My Money Check

Students complete the exit ticket independently. Assign a personalized budget outline as an optional take-home activity.

VIDEO NOTE-TAKING GUIDE

Watch the Planned to A.T. 10-10-80 budgeting video. Record what the presenter says.

The first step in creating a budget is:

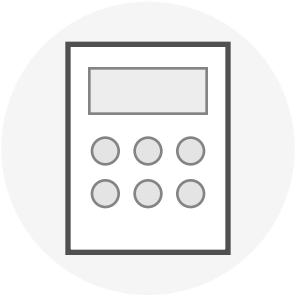

The 10-10-80 framework

Share	What is this portion for, according to the video?
10%	
10%	
80%	

Video example: $2,900 monthly take-home pay

Calculation	My answer
10% of $2,900	
Second 10% of $2,900	
80% of $2,900	
How much is left for “play money” after the priorities discussed in the video?	

Reflection: Which expense would be hardest for you to plan around?

10-10-80 MONEY CHALLENGE

Your monthly take-home pay is $2,900. Fill in the amounts below, then explain your choices.

Budget share	Math	Amount
First 10%	2,900 × 0.10	$_____
Second 10%	2,900 × 0.10	$_____
Remaining 80%	2,900 × 0.80	$_____

The tradeoff

A required expense increases by $85 this month. What would you adjust first, and why?

Bank statement quick guide

Term	Meaning
Beginning balance	Amount in the account at the start of the statement period.
Deposit / credit	Money added to the account.
Withdrawal / debit	Money taken from the account.
Running balance	Balance after each posted transaction.
Pending transaction	A purchase or payment not yet fully posted; it may affect spendable funds.

FINANCIAL CASE FILES

Read your assigned story, then examine the matching bank statement in the exhibit section. The historical statements are classroom simulations; the dates and merchant amounts are not current price estimates.

CASE 1 | STUART

Stuart likes designer shoes and used to ask his mother for money for purchases. She helped him open an account and provided $200 to start. He took a part-time restaurant job and began receiving $270 paychecks. He says there is nothing left to save. Investigate whether his spending supports that claim. The statement ends at $3.55 and includes negative running balances.

CASE 2 | TATIANA

Tatiana helps her mother with a nail salon and has been using a payment card for both salon errands and personal purchases. Her mother wants to distinguish authorized business expenses from personal spending before agreeing to pay Tatiana hourly. For this exercise, treat the statement as a shared fictional activity record for Tatiana’s purchases; do not infer card ownership from the account header. Identify which transactions require clarification.

CASE 3 | AYDEN

Ayden earns $120 every two weeks at a part-time job. He buys collectibles, games, food, and other items and believes they are all necessities. His statement ends at $0.60. Identify patterns and determine what two changes could free money for savings.

ADVANCED CASE 4 | KATIE

Katie’s statement starts with $2,500 already in the account. That amount is an opening balance, not evidence of monthly pay. She has rent, utilities, groceries, transportation, and discretionary purchases, and ends with $2.37. Identify priorities and estimate which expenses could be reduced without assuming her income.

FINANCIAL INVESTIGATION REPORT

Name: _____ Case: _____

Evidence to find	Your findings
Beginning balance	$_____
Money deposited during the period	$_____
Ending balance	$_____
Lowest balance shown	$_____
One fixed or predictable expense	_____
One variable expense	_____
One expense needing more context	_____

Three pieces of transaction evidence

What is the main financial risk?

Needs vs. wants: explain one judgment call

© 2026 Planned to A.T., Inc. | My Money Grows

BUDGET MAKEOVER

Use the case evidence to recommend two specific changes. Do not assume every nonessential purchase must be eliminated.

Change	Transaction / reason	Estimated savings
1.		$_____
2.		$_____
Total estimated savings		$_____

Savings plan

If this person saved $_____ each payday, how much would they save after four paydays? $_____

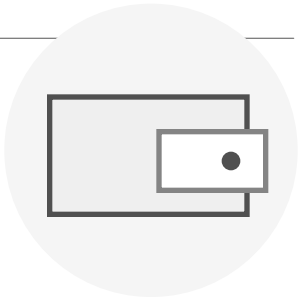

Which portion of the 10-10-80 framework would you prioritize, and why?

FINANCIAL EMERGENCY ALERT

A new $40 card transaction has been authorized but has not posted to the statement. For this classroom exercise, assume no other pending items or holds.

Case	Statement ending balance	After subtracting $40
Stuart	$3.55	_____
Tatiana	$58.74	_____
Ayden	$0.60	_____
Katie	$2.37	_____

What should your character do before making another purchase?

CASE CLOSED! | GROUP SHARE

Each group has 60–90 seconds. Use this structure to present your case.

Step	What to share
1. Introduce	Who did you investigate?
2. Show evidence	Which two transactions best support your conclusion?
3. Name the risk	What is the biggest money-management problem?
4. Recommend	What two specific changes would you make?
5. Defend	How could those changes support a savings goal?

Audience question

Ask the presenting group: “Which part of the bank statement supports that recommendation?”

MY MONEY CHECK | EXIT TICKET

1. What is the difference between a deposit and a withdrawal?

2. Why might your statement balance differ from the amount you can safely spend?

3. What is one realistic spending or saving action you could take this month?

TAKE-HOME | MY FIRST BUDGET

This page is optional. Use real numbers only if you feel comfortable; otherwise use a realistic fictional example.

Monthly planning category	Amount
Take-home income	$_____
Fixed / predictable expenses	$_____
Variable expenses	$_____
Savings goal	$_____
Flexible spending	$_____
Amount left after plan	$_____

Short-term savings goal

I want to save $_____ for _____ by _____.

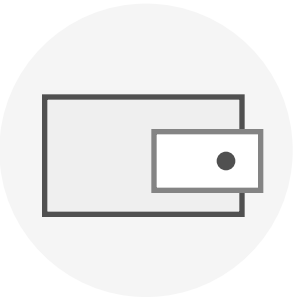

One habit I will change

_____

_____

_____

Remember: The 10-10-80 method is a starting point. Your budget must account for your actual obligations and priorities.

TEACHER ANSWER GUIDE

10-10-80 calculation

10% of $2,900 = $290; second 10% = $290; 80% = $2,320. Confirm category labels against the recorded PTAT video.

Bank statement evidence

Case	Beginning	Deposits shown	Ending	Key teaching point
Stuart	$200.00	$810.00	$3.55	Balance falls below $0; repeated clothing/shoe spending.
Tatiana	$47.00	$700.00	$58.74	Separate salon supplies from personal purchases; clarify account ownership.
Ayden	$35.00	$240.00	$0.60	Frequent small purchases; very limited cushion.
Katie	$2,500.00	$82.00	$2.37	Opening balance is not monthly earnings.

Emergency alert: statement ending balance minus $40

Stuart: −$36.45; Tatiana: $18.74; Ayden: −$39.40; Katie: −$37.63. These are classroom planning calculations, not guarantees of actual available balance or bank fees.

Facilitator cautions

Transactions alone do not prove whether a purchase is a need or want; ask for context. Do not imply that a negative balance automatically causes a particular overdraft fee. Encourage students to track pending purchases and account terms. Original statements are preserved as source exhibits; some older merchant names, dates, and fictional details may be inconsistent.

Suggested assessment

Look for: (1) correct reading of balance and transaction direction, (2) two grounded pieces of evidence, (3) feasible recommendations with math, (4) recognition of pending transaction risk.
